

## TABLE OF CONTENTS

### Theme: Numerical modelling of RC structures

<b>Numerical assessment of concentrated plasticity models of ductile RC frames in non-linear dynamic analyses</b> <i>Eleonora Bruschi   Virginio Quaglini   Paolo M. Calvi</i>	1
<b>Existing RC bare frames reinforced with smooth rebars: influence of the modelling approach</b> <i>Simone Pelucco   Anthony Paderno   Marco Preti</i>	9
<b>Influence of the infill panels on the loss of beam to column support</b> <i>Marius Eteme Minkada   Simone Labò   Alessandra Marini   Andrea Belleri</i>	17
<b>Global non-linear numerical analysis of slender reinforced concrete members including aleatory uncertainties</b> <i>Diego Gino   Luca Giordano   Giuseppe Carlo Marano</i>	23
<b>Determination of epistemic uncertainties in non-linear finite-element analyses of slender reinforced concrete elements</b> <i>Elena Miceli   Giuseppe Carlo Marano</i>	31
<b>Influence of epistemic uncertainties on the seismic vulnerability assessment of an existing RC building</b> <i>Giammaria Gabbianelli   Vanni Nicoletti   Daniele Perrone   Emanuele Brunesi</i>	39
<b>Nonlinear static procedures for state-dependent seismic fragility analysis of reinforced concrete buildings</b> <i>Livio Pedone   Roberto Gentile   Carmine Galasso   Stefano Pampanin</i>	47
<b>Fragility analysis for parallel plane frames RC structures subjected to ground settlements</b> <i>Andrea Miano   Annalisa Mele   Andrea Prota</i>	55
<b>Effectiveness of Arch Behaviour in Reinforced Concrete Beams Subjected to Shear</b> <i>Michele Win Tai Mak   Janet M. Lees</i>	63
<b>Use of static and dynamic test results for model updating of a steel-concrete composite bridge</b> <i>Antonio Bilotta   Alessandra De Angelis   Giusiana Testa   Luigi Starace   Maria Rosaria Pecce</i>	71
<b>Structural performance of reinforced concrete dapped-end beams: a preliminary experimental and numerical investigation</b> <i>Katherina Flores Ferreira   Matteo Colombo   Giulio Zani   Marco Carlo Rampini   Marco di Prisco</i>	79
<b>Structural behaviour of corrugated shells: a look at the Flaminio dome in Rome</b> <i>Matteo Lai   Emanuela Reccia   Mario Spagnuolo   Antonio M. Cazzani</i>	87
<b>Holistic strategies for control of tunnel linings</b> <i>Salvatore Aiello   Oscar Borla   Bernardino Chiaia   Giulia Marasco</i>	95
<b>Use of concrete as a basic material for a wave energy converter: load definition and structural feasibility</b> <i>Costanza Anerdi   Bruno Paduano   Pietro Casalone   Giovanni Bracco   Luca Giordano</i>	102

## **Theme: Seismic design & assessment of RC structures**

<b>Validation of pseudo-dynamic testing protocol through full-scale tests on two-storey infilled reinforced concrete frame</b>	
<i>Carmine Moliterno   Ciro Del Vecchio   Marco Di Ludovico   Andrea Prota</i>	109
<b>A parametric analysis of the seismic performance of bridges as a function of the DCFP device properties</b>	
<i>Guglielmo Amendola   Luca Giordano   Giuseppe Carlo Marano</i>	117
<b>Seismic reliability of reinforced concrete structures with Lateral Impact Resilient Double Concave Frictional Isolators</b>	
<i>Gaspar Auad   Paolo Castaldo   José L. Almazán</i>	125
<b>Seismic collapse margins of code-conforming reinforced concrete frame buildings considering multiple capacity criteria</b>	
<i>Danilo D'Angela   Gennaro Magliulo   Edoardo Cosenza</i>	133
<b>Integrating seismic and energy loss estimation for reinforced concrete buildings with precast concrete facades</b>	
<i>Simona Bianchi   Jonathan Ciurlanti   Mauro Overend   Stefano Pampanin</i>	141
<b>A novel framework based on Expected Annual Loss for optimizing seismic retrofitting in reinforced concrete structures</b>	
<i>Antonio Pio Sberna   Fabio Di Trapani   Giuseppe Carlo Marano</i>	149
<b>Comparison of Alternative Design Methodologies and Earthquake-Resistant Technologies in Terms of Probable Maximum Losses</b>	
<i>Jonathan Ciurlanti   Simona Bianchi   Stefano Pampanin</i>	157

## **Theme: Innovative strengthening systems**

<b>Numerical and Analytical Assessment of a Galvanized Welded Steel Wire Mesh: an Anti-Falling Debris Protection System for Ceiling</b>	
<i>Lorenzo Franceschini   Alice Sirico   Simone Ravasini   Beatrice Belletti   Andrea Vitali   Paolo De Berardinis</i>	165
<b>Seismic Retrofit of Reinforced Concrete buildings using low-damage external exoskeletons.</b>	
<i>Simone D'Amore   Stefano Pampanin</i>	173
<b>Beam-to-column friction connection for earthquake-resilient reinforced concrete frames made with hybrid trussed beams</b>	
<i>Salvatore Pagnotta   Alessia Monaco   Piero Colajanni   Lidia La Mendola</i>	181
<b>Optical fiber added Carbon Fiber Reinforce Polymers for the investigation of the bending stress transfers in reinforced concrete beams: first results</b>	
<i>Andrea Armonico   Mohamed Saidi   Laurent Michel   Sylvain Bel   Emmanuel Ferrier</i>	189
<b>Bond tests on steel plates externally bonded to concrete</b>	
<i>Elena Ciampa   Maria Rosaria Pecce</i>	196
<b>Preliminary estimation of the mechanical response of FRCM-strengthened RC shallow beams</b>	
<i>Marco Carlo Rampini   Giulio Zani   Matteo Colombo   Marco Di Prisco</i>	204
<b>Shear strengthening of Reinforced Concrete beams with Ultra-High Performance Fibre Reinforced Concrete: a numerical parametric study.</b>	
<i>Fabiola Iavarone   Fausto Minelli   Giovanni Plizzari   Frank J. Vecchio</i>	212

## **Theme: Properties and applications of cementitious materials**

### **Carbon sequestration in Steel Slag-based mortar: investigation of chemical composition and mechanical properties**

*Giuseppe Ferrara | Alberto Belli | Arno Keulen | Diego A. R. Santamaria | Jean-Marc Tulliani | Paola Palmero* 220

### **Fatigue behavior of cementitious mortars with high mechanical performances**

*Simone Barile | Costantino Menna* 228

### **Effect of hot and cold temperature on the mechanical behaviour of macro-synthetic fiber reinforced concretes**

*Clementina Del Prete | Nicola Buratti | Claudio Mazzotti* 235

### **Direct shear tests on fabric reinforced cementitious matrix composites without substrate**

*Pietro Meriggi | Sara Fares | Rebecca Fugger | Maurizio Ricci* 241

### **SFRC Segmental Lining-Joints Behaviour**

*Riccardo Donatelli | Luigi Forlingieri* 249

## **Theme: Durability & Corrosion**

### **Preserving the Modern: corrosion assessment of pilotis of a '70s reinforced concrete building in Florence**

*Marta Castellini | Marco Tanganelli | Cristiano Riminesi* 257

### **Carbonation depth measurement of concretes exposed to different curing and preconditioning conditions, using image-processing tools**

*Jessica Forsdyke | Janet M. Lees* 265

### **Durability of concrete containing Recycled Asphalt Pavement (RAP)**

*Salma Jaawani | Annalisa Franco | Giuseppina De Luca | Orsola Coppola | Antonio Bonati* 273

### **Simplified Methodology for the Evaluation of Corrosion Effects on Seismic Risk of Reinforced Concrete Frame Buildings**

*Filippo Molaioni | Stefano Pampanin | Zila Rinaldi* 281

### **Corrosion effects: detection, evaluation and modelling for structural assessment**

*Elena Casprini | Chiara Passoni | Alessandra Marini | Gianni Bartoli* 289

### **Concrete half-joints: corrosion damage analysis with numerical simulation**

*Marilisa Di Benedetto | Rebecca Asso | Raffaele Cucuzza | Marco Martino Rosso | Davide Maserà | Giuseppe Carlo Marano* 297

### **Influence of pattern corrosion on the time-dependent cyclic behavior of RC bridge columns**

*Angelo Pelle | Bruno Briseghella | Carlotta Contiguglia | Alessandro V. Bergami | Gabriele Fiorentino | Gian Felice Giaccu | Davide Lavorato | Giuseppe Quaranta | Alessandro Rasulo | Camillo Nuti* 305

## **Theme: Digital fabrication & Sustainability**

<b>Influence of accelerator on the pore structure of 3D printable concrete</b> <i>Yaxin Tao   Karel Lesage   Kim Van Tittleboom   Yong Yuan   Geert De Schutter</i>	313
<b>Investigation of the Structural and Thermal Behaviour of 3D Printed Concrete Walls</b> <i>Lucia Licciardello   Adriano Reggia   Giovanni Metelli   Giovanni A. Plizzari</i>	319
<b>Axial behavior of 3D printed cementitious panels: experimental investigation</b> <i>Paolino Cassese   Chiara Ciriello   Costantino Menna   Andrea Prota   Antonio Occhiuzzi</i>	326
<b>3D printing of non-planar concrete layers for the development of innovative structures</b> <i>Francesco Di Domenico   Ignacio Merino   Vittorio Palma   Giuseppe Guidone   Costantino Menna</i>	333
<b>Design-to-fabrication of a concrete slab using 3D printing technology</b> <i>Vittorio Palma   Marco Pellegrino   Giuseppe Guidone   Francesco Di Domenico   Costantino Menna</i>	339
<b>A progressive approach to optimise embodied carbon in concrete floors based on parametric design</b> <i>Amila Jayasinghe   John Orr   Will Hawkins   Tim Ibell   William Boshoff</i>	347
