## 3rd Workshop on Methodologies for Official Statistics Proceedings

### Programme Committee

#### Internal experts:

Orietta Luzi (coordinator)

|                  |                    |                    |                  |                        |
|------------------|--------------------|--------------------|------------------|------------------------|
| Ilaria Bombelli  | Mauro Bruno        | Maria Grazia Calza | Marco Di Zio     | Stefano Falorsi        |
| Danila Filippini | Alessio Guandalini | Letizia Marangon   | Francesco Ortame | Sara Emanuela Pagnotta |
| Mauro Scanu      | Fabrizio Solari    | Tiziana Tuoto      |                  |                        |

#### External experts from the Istat's Advisory Committee on Statistical Methods:

Daniela Cocchi (coordinator of the Istat's Advisory Committee on Statistical Methods)

|               |                        |                        |               |
|---------------|------------------------|------------------------|---------------|
| Marco Alfò    | Piet J.H. Daas         | Piero Demetrio Falorsi | David Haziza  |
| Brunero Liseo | Maria Giovanna Ranalli | Natalie Shlomo         | Li-Chun Zhang |

**Editorial activities:** Nadia Mignolli (coordinator), Alfredina Della Branca.

**Responsible for graphics:** Sofia Barletta.

## Welcome and opening session

|                                                                                                                         |    |
|-------------------------------------------------------------------------------------------------------------------------|----|
| Address by Professor Francesco Maria Chelli,<br>President of the Italian National Institute of Statistics - Istat ..... | 5  |
| Linking data for more integrated statistical analyses .....                                                             | 7  |
| A citizen-centric approach to data integration .....                                                                    | 11 |

## SESSION 1

### Methods for multisource statistics

|                                                                                                                                                |    |
|------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Introduction to Session 1   Methods for multisource statistics .....                                                                           | 15 |
| Master class   Official statistics on population parameters from a non-probability<br>sample or by integration with a probability sample ..... | 21 |
| Optimisation of Surveys: The “Integrated Census and Social Surveys System” Project .....                                                       | 35 |
| Linearisation approach for measuring the accuracy of multinomial<br>outcomes from a statistical register .....                                 | 55 |
| Combining survey data and mobile network operator data for commuting statistics .....                                                          | 65 |

## SESSION 2

### Methods for non-probabilistic data sources

|                                                                                          |     |
|------------------------------------------------------------------------------------------|-----|
| Introduction to Session 2   Methods for non-probabilistic data sources.                  |     |
| In memory of Piet J.H. Daas .....                                                        | 79  |
| Obituary Piet J.H. Daas (1963 – 2024) .....                                              | 81  |
| Master class   Generalised entropy calibration for analysing voluntary survey data ..... | 87  |
| Statistical use of Automatic Identification System (AIS) data .....                      | 105 |
| One-Stop-Shop for artificial intelligence/machine learning for official statistics ..... | 121 |
| Dealing with non-ignorable sampling and non-response in statistical matching .....       | 129 |

## SESSION 3

### Data, data science and official statistics

|                                                                              |     |
|------------------------------------------------------------------------------|-----|
| Introduction to Session 3   Data, data science and official statistics ..... | 141 |
| Master class   Data, data science and official statistics .....              | 149 |
| Conformal methods in official statistics: perspectives and challenges .....  | 157 |
| Uncertainty-based analysis for non-probability samples .....                 | 175 |

## SESSION 4

### New data sources for small area estimation

|                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------|-----|
| Introduction to Session 4   New Data Sources for Small Area Estimation .....                                                     | 183 |
| Master class   New data sources for official statistics .....                                                                    | 189 |
| Controlling selection bias in non-probability sample using small<br>area estimation: an application to official statistics ..... | 217 |
| Official statistics: Bayesian small area estimation of origin-destination matrix.....                                            | 219 |

## CLOSING SESSION

|                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------|-----|
| Final considerations and perspectives on the third Workshop on Methodologies for Official Statistics ... | 239 |
|----------------------------------------------------------------------------------------------------------|-----|
