

Creative recycling is a real art capable of giving a new birth and a new form to old and useless objects, transforming them into something completely different and creative.

It is an installation recreating the structure of a house with parking. In & Out is a name referred to inside and outside spaces: our print recalls a small sitting room with coloured walls. Each wall has pockets containing objects of different shapes (bottle caps, straws, curlers) and colours (red, red and black, red and white). Most pieces of furniture are made of recycled cases of wine (a writing desk, a stool and a drawer), there are also a coil with the name of the Association and three chairs partially handmade. All these objects are leaning on a green and orange carpet and there is an empty space, marked by a paper tape, to define the limits of the four parking places, reserved to disabled people and to bikes maintenance. Next to the paper welcome mat, there is a pair of paper shoes on which we have written the title of the print and the name of the involved Associations. The print dimensions are 4x4 meters and the shape of all the prints is a music spectrum, inscribed in a circle, contained in a square. Our recycled house was built thanks to Palazzo Verde Associations in Genova, that are AlVerde, CicloRiparo, Festival della Scienza, Legambiente, Maternmagna, ReMida, Terra, Terre di Mare. They provided us in particular with recycled wooden furniture, the carpet, transparent walls decorated with colourful recycled materials, plants, electric motor scooters, bikes and chairs.
