Preface

Following previous events held in Almeria (1998), Napoli (1999), Bilbao (2000), Alghero (2001), Valencia (2002), Trieste (2003), Cuenca (2004), Verbania (2005), Alcal de Henares (2006), Cagliari (2008), Badajoz, (2009), Lisbon (2011), Cividale del Friuli (2012), Madrid (2012), and Sevilla (2014), IbIt 2016 aims at further promoting the co-operation among Portuguese, Spanish and Italian researchers, providing a platform for discussion regarding new research and perspectives in Financial and Actuarial Mathematics.

The papers selected for the proceedings are concerned with a wide range of topics, with the intention of exploring a variety of financial and actuarial fields, presenting interesting and exciting challenges. Given the transnational orientation of IbIt 2016, we aim at bringing together Portuguese, Spanish and Italian researchers, hoping to further enhance and encourage future collaborations.

The organising committee is very pleased to have hosted all the colleagues in Paestum in such a friendly atmosphere. The committee is particularly thankful to prof. Emilia Di Lorenzo for her precious collaboration and contribution.

September 2016

Marilena Sibillo

Chair of the Conference

Committees

Organizing

Giovanna Apicella
Giovanna Bimonte
Valeria D'Amato
Luisa De Martino
Maria Russolillo

Scientific

Irene Arraiano, ISCAL
Anna Rita Bacinello, Università degli Studi di Trieste
