Complexity and Resilience

Urban experiences in Southern Europe

RIVER PUBLISHERS SERIES IN CHEMICAL, ENVIRONMENTAL, AND ENERGY ENGINEERING

Series Editors:

MEDANI P. BHANDARI

*Akamai University, USA; Sumy State University, Ukraine and Atlantic State
Legal Foundation, NY, USA*

JACEK BINDA

*PhD, Rector of the International Affairs, Bielsko-Biala School of Finance and Law,
Poland*

DURGA D. POUDEL

PhD, University of Louisiana at Lafayette, Louisiana, USA

SCOTT GARNER

*JD, MTax, MBA, CPA, Asia Environmental Holdings Group (Asia ENV Group),
Asia Environmental Daily, Beijing/Hong Kong, People's Republic of China*

HANNA SHVINDINA

*Sumy State University, Ukraine
and*

ALIREZA BAZARGAN

NVCo and University of Tehran, Iran

The “River Publishers Series in Chemical, Environmental, and Energy Engineering” is a series of comprehensive academic and professional books which focus on Environmental and Energy Engineering subjects. The series focuses on topics ranging from theory to policy and technology to applications.

Books published in the series include research monographs, edited volumes, handbooks and textbooks. The books provide professionals, researchers, educators, and advanced students in the field with an invaluable insight into the latest research and developments.

Topics covered in the series include, but are by no means restricted to the following:

- Energy and Energy Policy
- Chemical Engineering
- Water Management
- Sustainable Development
- Climate Change Mitigation
- Environmental Engineering
- Environmental System Monitoring and Analysis
- Sustainability: Greening the World Economy

Contents

List of Figures	ix
List of Tables	xv
List of Contributors	xvii
1 Complexifying Urban Histories: The Mediterranean Perspective	1
<i>Samaneh Sadat Nickayin, Kostas Rontos, Luca Salvati, and Giovanni Quaranta</i>	
The individual city's growth: A reflection on urbanisation patterns and processes in Mediterranean Europe	3
The legacy of the 'compact city'	5
Recent trends towards (and beyond) sprawl	8
Rise (and decline) of central cities	10
Demographic trends at the fringe of large cities	12
The 'environmental' dimension of change	16
Rethinking research on Mediterranean urbanities	18
References	21
2 Thirty Years Later: Homage (and Criticism) to Mediterranean Cities	39
<i>Samaneh Sadat Nickayin, Adele Sateriano, Rosanna Salvia, and Luca Salvati</i>	
Introduction	40
Unravelling antithetical approaches to urbanisation	42
Urbanisation as a distinctive dimension of the economic growth in the Mediterranean region	44
Rediscovering centrality of Mediterranean urban systems	48
'Mediterranean' keywords between global and local dynamics	51

Mediterranean cities: A new dawn after the dusk	52
Outside cities, beyond cities: Exurban development and the Mediterranean reality	56
The (supposedly) unique landscape of ‘Mediterranean cities’	59
Regenerating the Mediterranean city	61
Concluding remarks	64
References	66
3 Lost in Complexity, Found in Diversity: A Summary Look at the Social Geography of a Mediterranean City	77
<i>Jesus Rodrigo Comino, Gianluigi Salvucci, Gianluca Ladaga and Luca Salvati</i>	
Introduction	78
The complex geography of a modern city: The case of Athens	79
Urban cycles and Athens’ expansion	81
Late industrialisation and early suburbanisation in Athens	84
Exurban development and land consumption in Attica	87
Concluding remarks	89
References	89
4 Economic Transformations and Suburban Expansion in the Mediterranean City: Metropolitan Spaces Revisited	95
<i>Antonio Gimenez Morera, Gianluca Egidi, Anastasios Mavrakis and Luca Salvati</i>	
Introduction	96
Logical framework	98
Urban-rural convergence as a proof of suburbanisation: The case of Attica	102
The importance of socio-economic indicators	104
Urban-rural convergence in contemporary Attica	107
Suburbanisation as the dominant stage of Mediterranean cities’ life cycle	108
Urban-rural convergence as the result of suburban growth	111
Late suburbanisation and the future expansion of Mediterranean cities	113
Concluding remarks	115

References	
5 Socio-economic Resilience and the Local Background	
Context: Related Variety Matters	125
<i>Barbara Ermini, Sirio Cividino, Kostas Rontos and Luca Salvati</i>	
Introduction	126
Methodological issues	130
Empirical findings	134
Local resilience and related variety: Discussing the intrinsic linkage	137
Concluding remarks	140
References	141
Index	157
About the Editors	159

List of Figures

Figure 1.1	The ‘crisis city’: Mediterranean agglomerations as a prototype (downtown Athens, Greece; Source: authors’ photographic archive).	4
Figure 1.2	Relict rural landscapes at the fringe of large cities in the Mediterranean basin, Castelli Romani, South of Rome (Source: authors’ photographic archive).	6
Figure 1.3	Compact cities and infrastructures irradiate into the suburbs: the oldest metropolitan line in Athens (Source: authors’ photographic archive). .	7
Figure 1.4	Waiting for what? Urban expansion at the fringe, Oeiras, West Lisbon (Source: authors’ photographic archive).	8
Figure 1.5	The (newly) gentrified city (Neos Kosmos, Central Athens; Source: authors’ photographic archive).	10
Figure 1.6	Unpredictable urban expansion and agglomeration factors in central Athens (Source: authors’ photographic archive).	11
Figure 1.7	Vacant spaces derived from massive urbanisation into fringe land, Nikea, West Athens (Source: authors’ elaboration on Google Earth imagery). .	14
Figure 1.8	Welcome to the suburban city, clockwise from left to right, Lisbon, Barcelona, Rome and Athens (Source: authors’ elaboration on Google Earth imagery).	15
Figure 1.9	Land consumption and soil sealing are key environmental issues in Mediterranean suburbs (Megara, West Attica; Source: authors’ photographic archive).	17

Figure 1.10	Urban voids at the fringe of the consolidated urban fabric, Central Rome (Source: authors' photographic archive).	18
Figure 1.11	The 'miracle' of the dense city and the long-term legacy of settlement compactness in Athens (Source: authors' photographic archive).	20
Figure 2.1	A multidimensional interpretation of urban complexity: space vs. time axes and the role of sectoral dimensions of growth (Source: own elaboration).	42
Figure 2.2	A graphical illustration of the complex disciplinary palimpsest of contemporary Mediterranean cities (Source: authors' review of international scientific literature).	43
Figure 2.3	Planning 'linearity' and the geography of urban fractures; Rome's master plan, 1962 (Source: own elaboration of archive materials, municipality of Rome).	45
Figure 2.4	The 'modern' suburbs of Mediterranean cities: semi-compact settlements and urban voids in Kalamarià, Thessaloniki (Source: authors' photographic archive).	46
Figure 2.5	The urban-rural antithesis: further away from downtown Barcelona, the latent diversity of Mediterranean fringe landscapes (Source: own elaboration of land-use maps and field materials).	47
Figure 2.6	Compactness and steepness, the typical landscape of Mediterranean cities; clockwise: Barcelona, Athens and Naples (Source: authors' photographic archive).	49
Figure 2.7	The uneven expansion of contemporary Athens (Source: redrawn from authors' land-use models).	50
Figure 2.8	A plastic representation of Mediterranean cities' (intrinsic) ecological fragility (Source: redrawn from Aigues de Barcelona).	52

Figure 2.9	Toward ‘creative’ cities. Downtown Lisbon between tradition and modernity (Source: authors’ photographic archive).	54
Figure 2.10	Urban expansion and migration of natural land-use further away from metropolitan areas; Athens in the late 1980s (left) and middle 2010s (Source: authors’ elaboration of national land-use maps).	56
Figure 2.11	Heterogeneous fringe landscapes in Northern Attica, Greece (Source: authors’ photographic archive).	57
Figure 2.12	Cartographic representations of urban dispersion in Southern Europe; left: Rome; right: Lisbon (Source: own elaboration on European Environment Agency database).	58
Figure 2.13	Relict agricultural landscapes at the Mediterranean urban fringe (upper left: mixed rain-fed crop in a traditionally dry rural landscape under human pressure; upper right: pasture lands and woodlots affected by intense soil degradation in a peri-urban area; lower left: suburbanisation and land consumption at the fringe; lower right: forest fires as a threat for peri-urban agriculture). Source: authors’ photographic archive.	60
Figure 2.14	A biplot of multivariate analysis (principal component analysis with loadings: land-use type and scores: cities) illustrating the specific landscape structure in selected Mediterranean European cities (explained variance: 41.6% on axis 1 and 30.5% on axis 2).	61
Figure 2.15	Pervasive urban growth (left: 1972; right: 2013) in Thriasio plain, West Attica, and fragmentation of land planning in the area (Source: authors’ elaboration of land-use maps and statutory town plans).	63
Figure 2.16	Mixing urban and rural landscapes: complex and heterogeneous peri-urban design at Barcelona fringe, Spain (Source: own photograph).	64

Figure 3.1	The administrative organisation of the Athens' metropolitan region: municipal boundaries and definition of the Greater Athens' area and Piraeus (Source: authors' elaboration of official statistics derived from the Hellenic Statistical Authority, ELSTAT).	79
Figure 3.2	Digital elevation model (DEM) of Attica, indicating important toponyms (from left to right, larger circles indicate Thriasio, Greater Athens and Messoghia plains) (Source: authors' elaboration of official statistics derived from the Hellenic Statistical Authority, ELSTAT).	80
Figure 3.3	Land-use map of Attica (Source: authors' elaboration of Corine Land Cover database provided by Land Copernicus Initiative of the European Environment Agency).	81
Figure 3.4	Urban development at the West Athens' fringe (Source: authors' photographic archive).	83
Figure 3.5	Demographic wave characteristic of long-term Athens' growth (Source: authors' own elaboration of census data from ELSTAT).	83
Figure 3.6	Athens' evolution in the first phase (Source: authors' elaboration of topographic maps derived from the internet).	84
Figure 3.7	Dense buildings, industrial micro-settlements and urban voids in Athens' municipality, Patissia (Source: authors' photographic archive).	85
Figure 3.8	Athens' evolution in the last phase (Source: authors' elaboration of topographic maps derived from the internet).	87
Figure 3.9	A summary evaluation of pre-crisis demographic growth in Athens (Source: authors' elaboration of official statistics from ELSTAT).	88
Figure 4.1	Compact urban fabric, downtown Athens (Source: authors' photographic archive).	98
Figure 4.2	Suburban settlements in Milesi, Northern Attica (Source: authors' photographic archive).	99

Figure 4.3	A schematic representation of the first demographic transition (Source: authors' elaboration of a comprehensive literature review on demographic literature).	100
Figure 4.4	A schematic representation of the 'city life cycle' theory and demographic predictions (Source: authors' elaboration of a comprehensive literature review on urban literature).	100
Figure 4.5	The study area (Greater Athens in dark grey including Athens and Piraeus in black, and the rest of Attica in soft grey) and its position in Greece (insert). (Source: authors' elaboration on cartographic data released from ELSTAT).	102
Figure 4.6	Population density (inhabitants/km ²) in the Athens' metropolitan region (Source: authors' elaboration of statistical and cartographic data released by ELSTAT).	104
Figure 4.7	Infrastructural development in Elliniko, the former international airport of Athens, Southern Attica (Source: authors' photographic archive).	109
Figure 4.8	Suburban landscapes in Oropos, Northern Attica (Source: authors' photographic archive).	110
Figure 4.9	Athens' Riviera, a seaside resort within the compact city from Palio Faliro to Vouliagmeni, Southern Athens (Source: authors' photographic archive).	111
Figure 4.10	From urbanisation to suburbanisation: dense settlement expansion from Athens to Piraeus (Source: authors' photographic archive).	112
Figure 4.11	Shrinking (and creative) neighbourhoods in Central Athens (Source: authors' photographic archive).	114
Figure 5.1	Four dimensions of regional economic resilience following Martin (2012).	128
Figure 5.1	Athens' business district, Syngrou Avenue (Source: authors' photographic archive).	132

Figure 5.2	Downtown Athens' commercial district, the so called 'Emporiko Trigono' (Commercial Triangle) (Source: authors' photographic archive).	133
Figure 5.3	Spatial distribution of the Pielou index in Athens, per cent rate of growth, 2002–2008 (Source: authors' elaboration on national official statistics).	135
Figure 5.4	The relationship between average per capita declared income and change over time (%) in Pielou evenness (J index) at the municipal scale in the Athens' metropolitan region (Source: authors' elaboration on national official statistics).	136
Figure 5.5	Workers in high-tech businesses (per cent share in total jobs, left: 1991, middle: 2001 and right: change over time in the same variable between the two years).	137
Figure 5.6	Wealthy and resilient districts in Northern Athens: a commercial street in Kifissia (Source: authors' photographic archive).	139

List of Tables

Table 2.1	A collection of keywords depicting Mediterranean urbanities according to the geographical scale . . .	51
Table 2.2	The largest urban agglomerations in the Mediterranean basin	55
Table 4.1	Indicators considered in this study by thematic domain.	105
Table 4.2	Changes over time in the studied variables.	107
