

ETC3

ERME Topic Conference on Mathematics Teaching, Resources and Teacher Professional Development

Editors: Stefan Zehetmeier, Bettina Rösken-Winter, Despina Potari, Miguel Ribeiro
Organized by: Humboldt-Universität zu Berlin
Place: Berlin, Germany
Year of Conference: 2016
Year of Publication: 2017
ISBN: 978-3-00-058755-9

Content

Introduction

Researching Mathematics Teaching, Resources and Teacher Professional Development.....2

Stefan Zehetmeier, Bettina Rösken-Winter, Despina Potari, Miguel Ribeiro

Plenary Lectures

From collaborative research to Mathematics Teachers’s Specialised Knowledge: a story of knowledge.....5

José Carillo

Design principles and domains of knowledge for the professionalization of teachers and facilitators - Two examples from the DZLM for upper secondary teachers -..... 16

Bärbel Barzel, Rolf Biehler

WG 1 - Working Group: Teacher Education and Design Principles

Assessing pre-service teachers’ competence of analyzing learning support situations through a multi-format test instrument comprising of video, comic, and text vignettes.....36

Sebastian Kuntze, Marita Friesen

High inference rating system for an evaluation of metacognitive-discursive teaching and learning quality.....46

Edyta Nowińska

Using deliberative dialogue to analyse critically the role of families within a master program for future teachers of mathematics.....56

Yuly Marsela Vanegas, Javier Diez-Palomar, Joaquin Giménez, Vicenç Font

Prospective teachers' interpretative knowledge: giving sense to subtraction algorithms.....66

Pietro Di Martino, Maria Mellone, Ciro Minichini, Miguel Ribeiro

Problem creating tasks to develop teacher’s competencies.....76

Uldarico Malaspina, Vicenç Font, Joaquin Gimenez, Albert Mallart

Education of facilitators: Cooperation to compensate challenges of PD-courses for facilitators?..... 86

Larissa Zwetzscher

Design Research with a focus on content-specific professionalization processes: The case of noticing students' potentials.....96

Susanne Prediger, Susanne Schnell, Kim-Alexandra Rösike

Pre-service teachers' learning to notice students' fractional thinking: The design of a learning environment through a Learning Trajectory.....106

Pere Ivars, Ceneida Fernández, Salvador Llinares

Designing a web-based professional development toolkit for supporting the use of dynamic technology in lower secondary mathematics.....116

Alison Clark-Wilson, Celia Hoyles

Teachers' informal professional development on social media and social network sites: when and what do they discuss?..... 126

Jorryt van Bommel, Yvonne Liljekvist

WG 2 - Working Group: Teacher Resources and Research Methods

Assessment of candidates' mathematical knowledge on admission to primary education degrees: A requirement?.....137

Aitor Villarreal, Lluís Albarracín, Montserrat Prat, Núria Gorgorió

Reliability of the adapted mathematical knowledge for teaching number concepts and operations measures.....147

Dun Nkhoma Kasoka, Arne Jakobsen, Mercy Kazima

Development of motivation referring KCS and KCT in professional development courses.....157

Thomas Hahn, Andreas Eichler

Pedagogical context and its role in articulating mathematical knowledge for teaching.....167

Mark Hoover, Yvonne Lai

Relationships between the knowledge and beliefs about mathematics teaching and learning of two university lecturers in linear algebra.....177

Diana Vasco Mora, Nuria Climent Rodríguez

Conceptual issues in developing a framework for examining teachers’ knowledge.....	187
<i>Miguel Montes, Miguel Ribeiro, José Carrillo</i>	
Reasoning and proving in mathematics teacher education.....	197
<i>Jeppe Skott, Dorte Moeskær Larsen, Camilla Hellsten Østergaard</i>	
Using Concept Cartoons to investigate future teachers’ knowledge – new findings and results.....	207
<i>Libuše Samková</i>	
Teacher’s knowledge and the use of connections in the classroom.....	217
<i>Genaro de Gamboa, Edelmira Badillo, Miguel Ribeiro, Miguel Montes, Gloria Sánchez-Matamoros</i>	
 WG 3 - Working Group: Teacher Practice and Classroom Interaction	
Frameworks supporting the coding and development of mathematics teachers’ instructional talk in South Africa.....	228
<i>Hamsa Venkat, Jill Adler</i>	
Faults in preservice teachers problem posing: What do they tell us?.....	238
<i>Jasmina Milinković</i>	
Planning, teaching and reflecting on how to explain inverse rational numbers: The case of Ana.....	248
<i>Nadia Ferreira, João Pedro da Ponte</i>	
Promoting the understanding of representations by grade 3 pupils: Two teachers’ practices.....	258
<i>Isabel Velez, João Pedro da Ponte, Lurdes Serrazina</i>	
What (should) teachers assess in Elementary Geometry?.....	268
<i>Ana Donevska-Todorova</i>	
Mediating mathematics teaching for connections and generality.....	278
<i>Mike Askew</i>	

The didactician as a model within classroom activities: investigating her roles.....288
Annalisa Cusi, Francesca Morselli

Studying secondary mathematics teachers' attempts to integrate workplace into their teaching.....298
Chrissavgi Triantafillou, Giorgos Psycharis, Despina Potari, Theodossios Zachariades, Vasiliki Spiliotopoulou

Investigating the work of teaching geometric proof: The case of a Malawian secondary mathematics teacher.....308
Lisnet Mwadzaangati, Reidar Mosvold, Raymond Bjuland

Posters

Concept Cartoons created by prospective primary school teachers.....319
Alena Hošpesová, Marie Tichá

Design of Hypothetical Teacher Tasks (HTT) to access pre-service elementary teachers' knowledge on rational numbers.....321
Zetra Hainul, Putra Carl Winsløw

Developing the design of a role-play in a professional development.....323
Elisabet Mellroth

Glimpses of practice: pre-service teachers' evaluation of students' answers.....325
Alexandra Gomes

A Malawian preservice secondary school teacher's mathematical knowledge for teaching equations.....327
Florence Mamba, Reidar Mosvold, Raymond Bjuland

Preservice teachers' ability to assess student thinking and learning.....329
Ann-Kathrin Beretz, Katja Lengnink, Claudia von Aufschnaiter

Researching school development programs through classroom culture.....331

Richard Wester

Tracing diagnostic strategies of teachers and pre-service teachers: an explorative study on interactive video-simulations.....333

Sebastian Friedl, Simone Reinhold

Visualising connections.....335

Jonas Dahl, Anna Wernberg

Resistance seen as possibilities during professional development.....337

Christina Svensson

Assessment' practices to regulate teaching: A theoretical approach.....339

Elvira Santos, Leonor Santos

Linking face-to-face and distance phases in professional teacher training – an explorative research.....341

Karina Höveler, Natascha Albersmann, Martina Hoffmann, Luise Eichholz, Kim-Alexandra Rösike

Which mathematical contents make a good a primary teacher? Identification of specific contents and levels of school-related content knowledge relevant for the professional development of pre-service teachers.....343

Ulrich Kortenkamp, Johanna Goral, Ingrid Glowinski, Safyah Hassan-Yavuz, Joost Massolt, Jessica Seider, Sandra Woehlecke

Learning to observe mathematical learning in lesson studies.....345

Klaus Rasmussen, Camilla Helsteen Østergaard, Kristian Kildemoes Foss, Morten Korf Madsen, Kira Nielsen-Elkjær
