

CERME

Proceedings of the
Tenth Congress of
the European Society
for Research in
Mathematics Education

Editors: Thérèse Dooley and Ghislaine Gueudet
Organised by: Institute of Education, Dublin City University
Year: 2017

e r m e
european society for research in mathematics education

Editors

Thérèse Dooley, CASTeL, Institute of Education, Dublin City University, Ireland.

Ghislaine Gueudet, CREAD, ESPE de Bretagne, University of Brest, France.

Editorial Board

Mario Sánchez Aguilar; Gilles Aldon; Paul Andrews; Samuele Antonini; Jonas Bergman Ärlebäck; Fatma Aslan-Tutak; Michal Ayalon; Anna Baccaglioni-Frank; Arthur Bakker; Berta Barquero; Christiane Benz; Angelika Bikner-Ahsbals; Irene Biza; Lisa Björklund Boistrup; Nina Bohlmann; Orly Buchbinder; Susana Carreira; Renato Carvalho; Sona Ceretkova; Renaud Chorlay; Anna Chronaki; Kathy Clark; Alison Clark-Wilson; Jason Cooper; Seán Delaney; Pietro Di Martino; Javier Díez-Palomar; Ove Gunnar Drageset; Paul Drijvers; Ingvald Erfjord; Eleonora Faggiano; Daniel Frischemeier; Torsten Fritzlär; Eirini Geraniou; Imène Ghedamsi; Inés Maria Gómez-Chacón; Alejandro Gonzalez-Martin; Katalin Gosztonyi; Corinne Hahn; Mariam Haspekian; Thomas Hausberger; Kirsti Hemmi; Dave Hewitt; Jeremy Hodgen; Paola Iannone; Jenni Ingram; Eva Jablonka; Uffe Thomas Jankvist; Darina Jirotkova; Keith Jones; Gabriele Kaiser; Sibel Kazak; Iveta Kohanová; Sebastian Kuntze; Snezana Lawrence; Aisling Leavy; Esther Levenson; Peter Liljedahl; Thomas Lingefjard; Božena Maj-Tatsis; Mirko Marracci; Francesca Martignone; Michaela Maschietto; Tamsin Meaney; Joris Mithalal; Reidar Mosvold; Reinhard Oldenburg; Maurice O'Reilly; Marilena Pantziara; Birgit Pepin; Kirsten Pfeiffer; Alon Pinto; Núria Planas; Valentina Postelnicu; Caterina Primi; Elisabeth Rathgeb-Schnierer; Sebastian Rezat; Miguel Ribeiro; Kirsti Rø; Elisabetta Robotti; Ornella Robutti; Frode Rønning; Mirosława Sajka; Charalampos Sakonidis; Judy Sayers; Stanislaw Schukajlow; Marcus Schütte; Gerard Sensevy; Nathalie Sinclair; Jeppe Skott; Heidi Strømskag Måsøval; Andreas Stylianides; Gabriel Stylianides; Rukiye Didem Taylan; Amanjot Toor; Fabrice Vandebrouck; Michiel Veldhuis; Olov Viirman; Kjersti Wæge; Geoff Wake; Hans-Georg Weigand; Constantinos Xenofontos

TABLE OF CONTENTS

<u>Foreword: CERME10 in lovely Dublin</u> <i>Susanne Prediger, Viviane Durand-Guerrier</i>	1
Introduction	
<u>Introduction to the Proceedings of the Tenth Congress of the European Society for Research in Mathematics Education (CERME10)</u> <i>Thérèse Dooley, Ghislaine Gueudet</i>	3
<u>Statistical overview of CERME10</u> <i>Maurice O'Reilly</i>	6
Plenary Lectures	
<u>From advanced mathematical thinking to university mathematics education: A story of emancipation and enrichment</u> <i>Elena Nardi</i>	9
<u>Young children's early mathematical competencies: Analysis and stimulation</u> <i>Lieven Verschaffel, Joke Torbeyns, and Bert De Smedt</i>	31
Plenary Panel	
<u>Solid findings in mathematics education: What are they and what are they good for?</u> <i>Marianna Bosch, Tommy Dreyfus, Caterina Primi, Gerry Shiel</i>	53
<u>Solid findings in mathematics education: A necessary discussion</u> <i>Marianna Bosch</i>	53
<u>What are solid findings in mathematics education?</u> <i>Tommy Dreyfus</i>	57
<u>Solid findings in mathematics education: A psychometric approach</u> <i>Caterina Primi</i>	63
<u>Can the outcomes of PISA 2015 contribute to evidence-based decision making in mathematics education?</u> <i>Gerry Shiel</i>	68

TWG01: Argumentation and proof	78
<u>Introduction to the papers of TWG01: Argumentation and proof</u>	79
<u>Meta-mathematical knowledge about proof</u>	83
<i>Nadia Azrou</i>	
<u>Conceptualizing reasoning-and-proving opportunities in textbook expositions: Cases from secondary calculus</u>	91
<i>Andreas Bergwall</i>	
<u>Cognitive unity of theorems, theories and related rationalities</u>	99
<i>Paolo Boero</i>	
<u>Supporting classroom implementation of proof-oriented tasks: Lessons from teacher researcher collaboration</u>	107
<i>Orly Buchbinder</i>	
<u>A framework for classifying mathematical justification tasks</u>	115
<i>Boon Liang Chua</i>	
<u>An application of Habermas' rationality to the teacher's actions: Analysis of argumentation in two classrooms</u>	123
<i>AnnaMarie Conner</i>	
<u>Evolution of proof form in Japanese geometry textbooks</u>	131
<i>Marion Cousin and Takeshi Miyakawa</i>	
<u>Pre-service middle school mathematics teachers' interpretation of logical equivalence in proof by contrapositive</u>	139
<i>Esra Demiray and Mine Işıksal Bostan</i>	
<u>Issues of a quasi-longitudinal study on different types of argumentation in the context of division by zero</u>	147
<i>Christian Fahse</i>	
<u>The flow of a proof - Establishing a basis of agreement</u>	155
<i>Mika Gabel and Tommy Dreyfus</i>	
<u>Fostering and investigating students' pathways to formal reasoning: A design research project on structural scaffolding for 9th graders</u>	163
<i>Kerstin Hein and Susanne Prediger</i>	
<u>Misconceptions and developmental proof</u>	171
<i>Kirsti Hemmi, Erika Julin and Ray Pörn</i>	
<u>Primary and secondary students' argumentation competence: A case study</u>	179
<i>Eugenia Koleza, Nikolaos Metaxas and Klio Poli</i>	
<u>Proofs and refutations in school mathematics: A task design in dynamic geometry environments</u>	187
<i>Kotaro Komatsu and Keith Jones</i>	

<u>Can teacher trainees use inductive arguments during their problem solving activity?</u> <i>Eszter Kónya and Zoltán Kovács</i>	195
<u>Principles towards justification: A focus on teacher actions</u> <i>Joana Mata-Pereira and João Pedro da Ponte</i>	203
<u>A reference for studying the teaching of logic</u> <i>Zoé Mesnil</i>	211
<u>Revisiting Odysseus' proving journeys to proof: The 'convergent-bounded' question</u> <i>Andreas Moutsios-Rentzos and Faidra Kalozoumi-Paizi</i>	219
<u>Play and pre-proving in the primary classroom</u> <i>Maria Pericleous and David Pratt</i>	227
<u>Proof-based teaching as a basis for understanding why</u> <i>David Reid and Estela Vallejo Vargas</i>	235
<u>Mathematical reasoning in the written argumentation of primary students</u> <i>Silke Ruwisch</i>	243
<u>An expanded theoretical perspective for proof construction and its teaching</u> <i>John Selden and Annie Selden</i>	251
<u>Tool-based argumentation</u> <i>Kalliopi Siopi and Eugenia Koleza</i>	259
<u>Learning with the logic of inquiry: game-activities inside Dynamic Geometry Environments</u> <i>Carlotta Soldano and Ferdinando Arzarello</i>	267
<u>Reasoning-and-proving in geometry in school mathematics textbooks in Hong Kong</u> <i>Kwong-Cheong Wong</i>	275
<u>An exploratory teaching style in promoting the learning of proof</u> <i>Xiaoheng Yan, John Mason and Gila Hanna</i>	283
<u>Looking for the roots of an argument: Textbook, teacher, and student influence on arguments in a traditional Czech classroom</u> <i>Jana Žalská</i>	291
<u>Identifying phases and activities in the proving process of first-year undergraduates</u> <i>Katharina Kirsten</i>	299

TWG02: Arithmetic and number systems	301
<u>Introduction to the papers of TWG02: Arithmetic and number systems</u>	302
<u>A conception of between-state ratio in fraction form</u>	306
<i>Gulseren Karagoz Akar</i>	
<u>The double nature of didactic models in conceptualizing the evolution of number systems: A mathematical model and a learning tool</u>	314
<i>Marita Barabash and Raisa Guberman</i>	
<u>Dealing with large numbers: What is important for students and teachers to know?</u>	322
<i>Christine Chambris and Frédérick Tempier</i>	
<u>Working memory, number sense and arithmetical performance: Relations between these domains</u>	330
<i>Luciana Vellinho Corso and Beatriz Vargas Dorneles</i>	
<u>Number estimation in children: An assessment study with number line estimation and numerosity tasks</u>	338
<i>Beatriz Vargas Dorneles, Mariana Lima Duro; Nohemy Marcela Bedoya Rios; Camila Peres Noguez and Clarissa dos Santos Pereira</i>	
<u>Do lower-achieving children profit from derived facts-based teaching of basic multiplication? Findings from a design research study</u>	346
<i>Michael Gaidoschik, Kora Maria Deweis and Silvia Guggenbichler</i>	
<u>Fostering rational numbers understanding through percentage</u>	354
<i>Helena Gil Guerreiro and Lurdes Serrazina</i>	
<u>The fostering of flexible mental calculation in an inclusive mathematics classroom during Mutual Learning</u>	362
<i>Laura Korten</i>	
<u>Opportunities to acquire foundational number sense: A quantitative comparison of popular English and Swedish textbooks</u>	371
<i>Anna Löwenhielm, Gosia Marschall, Judy Sayers and Paul Andrews</i>	
<u>Seeking symmetry in distributive property: Children developing structure sense in arithmetic</u>	379
<i>Andrea Maffia and Maria Alessandra Mariotti</i>	
<u>Models' use and adaptation aiming at conceptual understanding of decimal numbers</u>	387
<i>Cristina Morais and Lurdes Serrazina</i>	
<u>Middle school students' difficulties in proportional reasoning</u>	395
<i>Oznur Soyak and Mine Isiksal</i>	
<u>Number line as a conceptual and didactical resource for teaching fractions using applets</u>	403
<i>Carlos Valenzuela García, Olimpia Figueras, David Arnau and Juan Gutiérrez-Soto</i>	
<u>How middle-grade students explain ordering statements within real life situation? An example of temperature context</u>	411
<i>Aysenur Yilmaz and Mine Isiksal-Bostan</i>	

TWG03: Algebraic thinking	419
<u>Introduction to the papers of TWG03: Algebraic thinking</u>	420
<u>The effect of two intervention courses on students' early algebraic thinking</u> <i>Maria Chimoni and Demetra Pitta-Pantazi</i>	424
<u>Grade 6 students' abilities to represent functional relationships</u> <i>Isil Isler, Susanne Strachota, Ana Stephens, Nicole Fonger, Maria Blanton, Angela Gardiner, and Eric Knuth</i>	432
<u>An APOS perspective of the understanding of the concept of vector subspace</u> <i>Lillias H.N Mutambara and Sarah Bansilal</i>	440
<u>Four-component decomposition of sense making in algebra</u> <i>Alik Palatnik and Boris Koichu</i>	448
<u>'Father Woodland': A learning environment to facilitate the development of algebraic thinking</u> <i>Ioannis Papadopoulos and Nafsika Patsiala</i>	456
<u>Aspects of proficiency in elementary algebra</u> <i>Guido Pinkernell, Christian Düsi and Markus Vogel</i>	464
<u>Functional thinking and generalisation in third year of primary school</u> <i>Eder Pinto and María C. Cañadas</i>	472
<u>Didactic transposition in school algebra: The case of writing equations of parallel and perpendicular lines</u> <i>Valentina Postelnicu</i>	480
<u>Students' and teachers' mental solving of algebraic equations: From differences to challenges</u> <i>Jérôme Proulx, Marie-Line Lavallée-Lamarche, & Karl-Philippe Tremblay</i>	488
<u>Introduction to equation solving for a new generation of algebra learners</u> <i>Ann-Sofi Røj-Lindberg, Ann-Maija Partanen and Kirsti Hemmi</i>	496
<u>An insight into the sources of multiple referents for the unknown in the algebraic solving of word problems</u> <i>Carlos Soneira, José Antonio González-Calero and David Arnau</i>	504
<u>Key ideas as guiding principles to support algebraic thinking in German primary schools</u> <i>Anna Susanne Steinweg</i>	512
<u>Constraints to a justification of commutativity of multiplication</u> <i>Heidi Strømskag and Anita Valenta</i>	520
<u>Shape patterning tasks: An exploration of how children build upon their observations when asked to construct general terms</u> <i>Aisling Twohill</i>	529

<u>Multiple models for teaching logarithms - with a focus on graphing functions</u>	537
<i>Christof Weber</i>	
<u>Hierarchical and non-hierarchical clustering methods to study students algebraic thinking in solving an open-ended questionnaire</u>	545
<i>Benedetto Di Paola, Rosario Battaglia and Claudio Fazio</i>	
<u>Conceptualizing the core of the function concept – A facet model</u>	547
<i>Carina Zindel</i>	
<u>A classical dot pattern-based approach to algebraic expressions in a multicultural classroom</u>	555
<i>Marc Sauerwein and Malte Mink</i>	
<u>An instructor-generated concept framework for elementary algebra in the tertiary context</u>	557
<i>Claire Wladis, Kathleen Offenholley, Jae Ki Lee, Dale Dawes, Susan Licwinko</i>	
TWG04: Geometry	559
<u>Introduction to the papers of TWG04: Geometry education</u>	560
<u>Learning to use a protractor: Touch screen tablet or not?</u>	564
<i>Cécile Allard and Edith Petitfour</i>	
<u>Constructing draggable figures using GeoGebra: The contribution of the DGE for geometric structuring</u>	572
<i>Lina Brunheira and João Pedro da Ponte</i>	
<u>Geometric constructions in a dynamic environment (GeoGebra): The case of in-service teachers</u>	580
<i>Dorit Cohen, Anatoli Kouropatov, Regina Ovodenko, Maureen Hoch and Sara Hershkovitz</i>	
<u>Transitioning from definitions to proof: Exploring non-Euclidean geometry in a college geometry course</u>	588
<i>Rebecca Dibbs and Janessa Beach</i>	
<u>Teaching geometry to students (from five to eight years old) “All that is curved and smooth is not a circle”</u>	597
<i>Jacques Douaire and Fabien Emprin</i>	
<u>Dialogic processes in collective geometric thinking: A case of defining and classifying quadrilaterals</u>	605
<i>Taro Fujita, Jonathan Doney and Rupert Wegerif</i>	
<u>Double perspective taking processes of primary children – adoption and application of a psychological instrument</u>	613
<i>Cathleen Heil</i>	

<u>Traveling in spatiality, in spatial sense</u>	621
<i>Catherine Houdement</i>	
<u>Autism and mathematics education</u>	629
<i>Michiel Klaren, Birgit Pepin and Marieke Thurlings</i>	
<u>Learning sine and cosine in French secondary schools</u>	637
<i>Ratha Loeng</i>	
<u>The Pythagorean theorem in mathematics laboratory</u>	645
<i>Michela Maschietto, Stefano Barbieri, Francesca Scorcioni</i>	
<u>The design of a teaching sequence on axial symmetry, involving a duo of artefacts and exploiting the synergy resulting from alternate use of these artefacts</u>	653
<i>Antonella Montone, Eleonora Faggiano and Maria Alessandra Mariotti</i>	
<u>Hide and think: Limiting the obvious and challenging the mind in geometry</u>	661
<i>Chrysi Papadaki</i>	
<u>What influences grade 6 to 9 pupils' success in solving conceptual tasks on area and volume</u>	669
<i>Veronika Tůmová</i>	
<u>Shapes recognition in early school: How to develop the dimensional deconstruction?</u>	677
<i>Céline Vendeira and Sylvia Coutat</i>	
<u>The construction and study of the ellipse through Huzita-Hatori axioms: An investigative activity in analytic geometry classes</u>	685
<i>Fabiana Chagas de Andrade, Thais de Sales Ribeiro and Bruna Mayara Batista Rodrigues</i>	
<u>A scale on cognitive configurations for tasks requiring visualization and spatial reasoning</u>	687
<i>Teresa F. Blanco, Pablo G. Sequeiros, Cristina Núñez, María Salgado</i>	
<u>Diagrams in students' proving activity in secondary school geometry</u>	689
<i>Keith Jones and Kotaro Komatsu</i>	
<u>QED-Tutrix: Creating and expanding a problem database towards personalized problem itineraries for proof learning</u>	691
<i>Michele Tessier-Baillargeon, Nicolas Leduc, Ludovic Font, Philippe R. Richard and Michel Gagnon</i>	
<u>Children's block-building: How do they express their knowledge of geometrical solids?</u>	693
<i>Susanne Wöller and Simone Reinhold</i>	

TWG05: Probability and statistics education	695
<u>Introduction to the papers of TWG05:</u>	
<u>Probability and statistics education</u>	696
<u>Errors or didactic resources: A teacher education task in the context of probability</u> <i>Laura Afeltra, Maria Mellone, Piera Romano and Roberto Tortora</i>	700
<u>Negotiating the content and the teaching of statistics:</u>	
<u>Two complementary processes in teachers' professional development</u> <i>Dionysia Bakogianni</i>	708
<u>Common patterns of thought and statistics: Accessing variability through the typical</u> <i>Christian Büscher</i>	716
<u>Do attitudes toward statistics change during an introductory statistics course?</u> <u>A study on Italian psychology students</u> <i>Francesca Chiesi and Caterina Primi</i>	724
<u>Informal statistical inference and pre-service primary school teachers:</u> <u>The development of their content knowledge and pedagogical content</u> <u>knowledge during a teacher college intervention</u> <i>Arjen de Vetten, Judith Schoonenboom, Ronald Keijzer and Bert van Oers</i>	732
<u>Chilean primary-school students' levels in reading pictograms</u> <i>Danilo Díaz-Levicoy, Pedro Arteaga, and Carmen Batanero</i>	740
<u>Conditional probability as a decision-making tool: A didactic sequence</u> <i>Raimundo Elicer and Eduardo Carrasco</i>	748
<u>Stepwise development of statistical literacy and thinking in a statistics</u> <u>course for elementary preservice teachers</u> <i>Daniel Frischmeier & Rolf Biehler</i>	756
<u>Variables characterizing correlation and regression problems in the</u> <u>Spanish high school textbooks</u> <i>María M. Gea, Carmen Batanero, Pedro Arteaga and J. Miguel Contreras</i>	764
<u>Middle school mathematics teachers' pedagogical content knowledge</u> <u>in relation to statistical reasoning</u> <i>Rukiye Gökce and Sibel Kazak</i>	772
<u>Using sport-related socially open-ended problems to coordinate</u> <u>decision-making, variability modeling and value awareness</u> <i>Orlando González and Somchai Chitmun</i>	780
<u>Insights into the approaches of young children when making informal</u> <u>inferences about data</u> <i>Aisling M. Leavy</i>	788
<u>Students' conception of a sample's relation to the population</u> <u>when constructing models of resampling</u> <i>Jeffrey A. McLean and Helen M. Doerr</i>	796

<u>At-distance college-level training in statistical methods: Prospects and considerations</u> <i>Maria Meletiou-Mavrotheris, Efi Paparistodemou and Ana Serrado Bayes</i>	804
<u>Insights from students' reasoning about probability when they design their own Scratch games</u> <i>Efi Paparistodemou, Maria Meletiou-Mavrotheris and Christina Vasou</i>	812
<u>Using spreadsheets to teach probability in French high school</u> <i>Bernard Parzysz</i>	820
<u>Technology will solve student's probability misconceptions: Integrating simulation, algorithms and programming</u> <i>Annarosa Serpe and Maria Giovanna Frassia</i>	828
<u>High school students' first experiences with the sampling distribution: Toward a distributive perspective of sampling and inference</u> <i>Eleazar Silvestre and Ernesto Sanchez</i>	836
<u>Using student models to generate feedback in a university course on statistical sampling</u> <i>Sietske Tacoma, Paul Drijvers and Peter Boon</i>	844
<u>Undergraduate students' perceptions of learning introductory statistics through producing a statistical picture book</u> <i>Natthapoj Vincent Trakulphadetkrai</i>	852
<u>Enhancing statistical literacy</u> <i>Marianne van Dijke-Droogers, Paul Drijvers and Jos Tolboom</i>	860
<u>Implementing the statistical investigative process with real data: Effects on education in secondary schools</u> <i>Martin Andre</i>	868
<u>Metaphorical representations of multifaced statistical concepts: An access to implicit dominant interpretation by teachers?</u> <i>Corinne Hahn</i>	870
<u>Non-mathematics majors doing statistics: Factors behind performance</u> <i>Theognosia Michailidou</i>	872
<u>Relating theoretical and empirical probability - Developing students' conceptions of probability and chance in primary school</u> <i>Kristina Penava</i>	874

TWG06: Applications and modelling **876**
Introduction to the papers of TWG06: Applications and modelling **877**

<u>Developing a classification scheme of definitions of Fermi problems in education from a modelling perspective</u>	884
<i>Jonas Bergman Ärlebäck and Lluís Albarracín</i>	
<u>Levels of analysis of a mathematical modelling activity: Beyond the questions-answers dialectic</u>	892
<i>Berta Barquero, Nacho Monreal and Noemí Ruíz-Munzón</i>	
<u>Mathematical modelling as a prototype for interdisciplinary mathematics education? – Theoretical reflections</u>	900
<i>Rita Borromeo Ferri and Nicholas Mousoulides</i>	
<u>Mathematical modelling of dynamical systems and implementation at school</u>	908
<i>Martin Bracke and Jean-Marie Lantau</i>	
<u>Creating a color palette: The model, the concept, and the mathematics</u>	916
<i>Susana Carreira and Ana Margarida Baioa</i>	
<u>Examining the role of group work as an effective instructional strategy when teaching problem solving</u>	924
<i>Eamonn Clohessy and Patrick Johnson</i>	
<u>Modelling problems in German grammar school leaving examinations (Abitur) – Theory and practice</u>	932
<i>Gilbert Greefrath, Hans-Stefan Siller, Matthias Ludwig</i>	
<u>The investigation of mathematical problem-solving processes of fifth grade students in small groups</u>	940
<i>Firdevs İclal Karatas, Öznur Soyak and Ayşenur Alp</i>	
<u>Geometric modelling inspired by Da Vinci: Shaping and adding movement using technology and physical resources</u>	948
<i>Diego Lieban and Zsolt Lavicza</i>	
<u>Choosing a Mathematical Working Space in a modelling task: The influence of teaching</u>	956
<i>Elizabeth Montoya Delgadillo, Fernanda Viola and Laurent Vivier</i>	
<u>Fifth-grade students construct decimal number through measurement activities</u>	964
<i>Abolfazl Rafiepour & Azam Karimianzade</i>	
<u>Teachers' beliefs about mathematical modelling: An exploratory study</u>	972
<i>Paola Ramirez</i>	
<u>Didactical activities to engineering training: Methodological proposal</u>	980
<i>Avenilde Romo, Santiago Tolentino and Rebeca Romo-Vázquez</i>	
<u>Mathematical modelling in an archaeological context: Their complementarity as essential tool for inquiry</u>	988
<i>Gemma Sala, Vicenç Font, Berta Barquero and Joaquim Giménez</i>	

<u>Strategies for fostering students' reading comprehension while they solve modelling problems</u>	996
<i>Madlin Schmelzer and Stanislaw Schukajlow</i>	
<u>Methodology for designing didactical activities as an engineering project of a tactile sensorial therapeutic ramp</u>	1004
<i>Luis Siero, Avenilde Romo and Arturo Abundez</i>	
<u>The use of heuristic strategies in modelling activities</u>	1012
<i>Peter Stender and Gabriele Kaiser</i>	
<u>Metacognitive modelling competencies in small groups</u>	1020
<i>Katrin Vorhölter, Alexandra Krüger, and Lisa Wendt</i>	
<u>Product orientation in modeling tasks</u>	1028
<i>Wolfgang Bock, Martin Bracke and Patrick Capraro</i>	
<u>Modeling tasks and mathematical work</u>	1031
<i>Charlotte Derouet, Alain Kuzniak, Dominique Laval, Elizabeth Montoya Delgadillo, Laurent Moutet, Assia Nechache, Bernard Parzys, Laurent Vivier</i>	
<u>Mathematical modeling and competencies for biology students</u>	1033
<i>Yannis Liakos</i>	
<u>Phenomenological analysis of the line: A study based on the Didactical Analysis of mathematical knowledge</u>	1035
<i>Guillermo Ramírez-Montes and Fabián Gutiérrez-Fallas</i>	
TWG08: Affect and mathematical thinking	1037
<u>Introduction to the papers of TWG08: Affect and mathematical thinking</u>	1038
<u>Positioning and emotions in learning algebra: The case of middle-achieving students</u>	1042
<i>Wajeih Daher, Osama Swidan, Amani Masarwa</i>	
<u>The role of affect in failure in mathematics at the university level: The tertiary crisis</u>	1050
<i>Pietro Di Martino and Francesca Gregorio</i>	
<u>Primary future teachers' expectations towards development courses on mathematics teaching</u>	1058
<i>Silvia Funghi</i>	
<u>Regression trees and decision rules applied to the study of perplexity: Issues and methods</u>	1066
<i>Inés M^a Gómez-Chacón, J. Tinguaro Rodríguez</i>	

<u>Impact of long-term regular outdoor learning in mathematics – The case of John</u>	1074
<i>Annika Grothérus and Emilia Fägerstam</i>	
<u>Finnish educators’ conceptions of the social-emotional needs of mathematically gifted high school students</u>	1082
<i>Eeva Haataja and Anu Laine</i>	
<u>The qualitative differences in generative characteristic of the aesthetic sensibility: Analysis of learners’ problem solving</u>	1090
<i>Hayato Hanazono</i>	
<u>Identifying subgroups of CERME affect research papers</u>	1098
<i>Markku S. Hannula and Enrique Garcia Moreno-Esteva</i>	
<u>Tracing mathematics-related belief change in teacher education programs</u>	1106
<i>Çiğdem Haser and Işıl İşler</i>	
<u>Teaching self-regulation strategies with SOLVE IT to two students with learning disabilities: Effects on mathematical problem-solving performance</u>	1114
<i>Keffe Paraskevi, Dermitzaki Irini, Tzivinikou Sotiria and Stathopoulou Charoula</i>	
<u>To err is human. The management and emotional implications of teacher error</u>	1122
<i>Elizabeth Lake</i>	
<u>Students’ images of mathematics: The role of parents’ occupation</u>	1130
<i>Ciara Lane</i>	
<u>Emotions and problem solving by prospective primary school teachers</u>	1138
<i>Gareth Lewis</i>	
<u>On the edges of flow: Student engagement in problem solving</u>	1146
<i>Peter Liljedahl</i>	
<u>Exploring daily emotions of a mathematics teacher in a classroom: The case of Christian</u>	1154
<i>Gustavo Martínez-Sierra, Yuridia Arellano-García, Antonia Hernández-Moreno and Cristian Nava-Guzmán</i>	
<u>The suitability of rich learning tasks from a pupil perspective</u>	1162
<i>Elisabet Mellroth</i>	
<u>Upper secondary mathematics teachers’ beliefs expressed through metaphors</u>	1170
<i>Marilena Pantziara, Marianna Karamanou and Alexandra Petridou</i>	
<u>Multiple solutions for real-world problems, and students’ enjoyment and boredom</u>	1178
<i>Stanislaw Schukajlow and Kay Achmetli</i>	
<u>Self-efficacy and mathematics performance: Reciprocal relationships</u>	1186
<i>Karin Elisabeth Sørli Street, Lars-Erik Malmberg and Gabriel J. Stylianides</i>	
<u>Personal meaning and motivation when learning mathematics: A theoretical approach</u>	1194
<i>Neruja Suriakumaran, Christoph Duchhardt and Maike Vollstedt</i>	

<u>Mathematical memory revisited: Mathematical problem solving by high-achieving students</u> <i>Attila Szabo</i>	1202
<u>The mathematical values in the Turkish Middle School Mathematics Applications Course Curriculum</u> <i>Gülçin Tan-Şişman and Büşra Kirez</i>	1210
<u>A case study on Finnish pupils' mathematical thinking: Problem solving and view of mathematics</u> <i>Hanna Viitala</i>	1218
<u>Exploring affective reactions of children to Scratch programming and mathematics: The case of Kim</u> <i>Johanna Carvajal</i>	1226
<u>Documenting metacognitive activity in qualitative interviews with high school graduates</u> <i>Sebastian Mungenast</i>	1228
TWG09: Mathematics and language	1230
<u>Introduction to the papers of TWG09: Mathematics and language</u>	1231
<u>Rethinking students' comments in the mathematics notebook</u> <i>Matías Arce, Tomás Ortega and Núria Planas</i>	1235
<u>The duck is the biggest – kindergartners talking about measurement and magnitudes</u> <i>Birgit Brandt and Sarah Keuch</i>	1243
<u>Educating to rationality in a narrative context: An experimentation</u> <i>Gemma Carotenuto, Cristina Coppola¹ and Roberto Tortora</i>	1252
<u>Implicit and explicit processes of establishing explaining practices – Ambivalent learning opportunities in classroom discourse</u> <i>Kirstin Erath</i>	1260
<u>Young children's appropriation of mathematical discourse: Learning subtraction in a plurilingual classroom</u> <i>Marie Therese Farrugia</i>	1268
<u>Language in argumentation and solution of problems with graphs</u> <i>Pier Luigi Ferrari</i>	1276
<u>Talking with objects</u> <i>Marei Fetzer and Kerstin Tiedemann</i>	1284
<u>Occasions for productive interactions in inclusive mathematics classrooms that arise following mistakes</u> <i>Uta Häsel-Weide</i>	1292

<u>Revisiting the roles of interactional patterns in mathematics classroom interaction</u> <i>Jenni Ingram, Nick Andrews and Andrea Pitt</i>	1300
<u>Constructing mathematical meaning of the cosine function using covariation between variables in a modeling situation in Cabri</u> <i>Faten Khalloufi-Mouha</i>	1308
<u>DeafMath: Exploring the influence of sign language on mathematical conceptualization</u> <i>Christina M. Krause</i>	1316
<u>Fostering of interdisciplinary learning through basic education in computer science in mathematics in primary education</u> <i>Peter Ludes and Marcus Schütte</i>	1324
<u>On the nature of spatial metaphors: Dimensions of spatial metaphors and their use among fifth graders</u> <i>Angel Mizzi</i>	1332
<u>Ensuring methodological rigor for investigating the discourse development of bilingual mathematics learners</u> <i>Máire Ní Ríordáin, Éilis Flanagan and Claire Brilly</i>	1340
<u>Entering the mathematical register through evolution of the material milieu for classification of polygons</u> <i>Frode Rønning and Heidi Strømshag</i>	1348
<u>The discourse of a teacher as a means to foster the objectification of a vector quantity: The case of a novice teacher</u> <i>Ulises Salinas-Hernández, Luis Moreno-Armella and Isaias Miranda</i>	1356
<u>Effects of linguistic variations of word problems on the achievement in high stakes tests</u> <i>Sabine Schlager, Jana Kaulvers and Andreas Büchter</i>	1364
<u>Multilingual learners' opportunities for productive engagement in a bilingual German-Turkish teaching intervention on fractions</u> <i>Alexander Schüler-Meyer</i>	1372
<u>Authority structures in preservice teachers' talk</u> <i>Konstantinos Tatsis and Bozena Maj-Tatsis</i>	1380
<u>How do students develop lexical means for understanding the concept of relative frequency? Empirical insights on the basis of trace analyses</u> <i>Lena Wessel</i>	1388
<u>Conceptions of the transition from the difference quotient to the derivative in imaginary dialogues written by preservice teachers</u> <i>Annika M. Wille</i>	1396
<u>Functions: Implicit</u> <i>Vivica Zweidar</i>	1404
<u>Which textual features are difficult when reading and solving mathematics tasks?</u> <i>Anneli Dyrvold</i>	1412

<u>Language and risk literacy</u>	1414
<i>Dianne J. Kenton</i>	
<u>Professional competences of future mathematics teachers concerning the role of language in mathematics teaching and learning</u>	1416
<i>Nadine Krosanke</i>	
<u>Getting language awareness: A curriculum for language and language teaching for pre-service studies for teachers of mathematics</u>	1418
<i>Carina Rauf and Barbara Schmidt-Thieme</i>	

TWG10: Diversity and mathematics education: Social, cultural and political challenges **1420**

Introduction to the papers of TWG10: Diversity and mathematics education: Social, cultural and political challenges **1421**

<u>Incepted neoliberal dreams in school mathematics and the ‘Chilean experience’</u>	1425
<i>Melissa Andrade-Melina</i>	
<u>“It is only a test” – social aspects of displaying knowledge in mathematics for second language learners</u>	1433
<i>Anette Bagger</i>	
<u>Subjective theories of teachers in dealing with heterogeneity</u>	1441
<i>Elisa Bitterlich, Judith Jung and Marcus Schütte</i>	
<u>Teaching practices in a mathematics classroom and their connection to race and racism in the United States</u>	1449
<i>Sabrina Bobsin Salazar</i>	
<u>The context of workplaces as part of mathematics education in vocational studies: Institutional norms and (lack of) authenticity</u>	1457
<i>Lisa Björklund Boistrup and John Keogh</i>	
<u>Exploring Roma learning mathematics: A socio-mathematical view</u>	1465
<i>Javier Díez-Palomar</i>	
<u>(Wanting to do) Ethical research in a shifting context</u>	1473
<i>Andrea Eikset, Trude Fosse, Troels Lange, Johan Lie, Magni Hope Lossius, Tamsin Meaney and Elena Severina</i>	
<u>How Sámi teachers’ development of a teaching unit influences their self-determination</u>	1481
<i>Anne Birgitte Fyhn, Tamsin Meaney, Kristine Nystad and Ylva Jannok Nutti</i>	
<u>Class, ‘ability’ groups and mathematics in English secondary schools: A review</u>	1489
<i>Colin Jackson</i>	

<u>Content-related and social participation in inclusive mathematics education</u> <i>Judith Jung and Marcus Schütte</i>	1497
<u>The socio-politics of teacher explanation in mathematics education</u> <i>David Kollosche</i>	1505
<u>Polish parents' views on mathematics education in Swedish preschools</u> <i>Dorota Lembrér</i>	1513
<u>The mathematics teacher's quasi-Darwinism: Problematizing mathematics education research</u> <i>Alex Montecino</i>	1521
<u>Towards cultural responsiveness in mathematics education</u> <i>Swapna Mukhopadhyay and Brian Greer</i>	1529
<u>Mathematics at the enterprise: Industry, university and school working together to facilitate learning</u> <i>Hans Kristian Nilsen and Anne Vegusdal</i>	1537
<u>"No, it just didn't work": A teacher's reflections on all-attainment teaching</u> <i>Hilary Povey and Colin Jackson</i>	1545
<u>Diversity in an inclusive mathematics classroom: A student perspective</u> <i>Helena Roos</i>	1553
<u>School mathematics education through the eyes of students in Ghana: Extrinsic and intrinsic valuing</u> <i>Wee Tiong Seah, Ernest Kofi Davis and Monica E. Carr</i>	1561
<u>Integrating critical theory and practice in mathematics education</u> <i>David Swanson and Laura Black</i>	1569
<u>Cultural diversity as a resource or an obstacle for teaching practices in multicultural milieu: Experience of a training course for Italian teachers about Chinese Shuxue</u> <i>Benedetto Di Paola and Giovanni Giuseppe Nicosia</i>	1577
<u>Reflections of Fröbel in discourses about mathematics in Scandinavian early childhood education and care</u> <i>Andrea Eikset</i>	1579
<u>Collaborative learning in multigrade mathematics education at primary level</u> <i>Rachel-Ann Friesen</i>	1581
<u>Supporting young children's mathematical register learning in two languages: ICT possibilities</u> <i>Troels Lange and Tamsin Meaney</i>	1583
<u>Bangladeshi rural secondary madrasa (Islamic school) children's participation in higher mathematics optional course: A close look through gender lens</u> <i>K.M. Nabiul Alam</i>	1585
<u>Culturally-inspired mathematics and science education</u> <i>Shipra Sachdeva, Per-Odd Eggen and Halvor Hoveid</i>	1587
<u>Being in the diversity and going through the infinity</u> <i>Cássia Aline Schuck and Cláudia Regina Flores</i>	1589

TWG11: Comparative studies in mathematics education	1591
<u>Introduction to the papers of TWG11:</u>	
<u>Comparative studies in mathematics education</u>	1592
<u>Beginning teachers' perspectives on linear equations: A pilot quantitative comparison of Greek and Cypriot students</u>	1594
<i>Paul Andrews and Constantinos Xenofontos</i>	
<u>Comparing the practices of primary school mathematics teacher education Case studies from Japan, Finland and Sweden</u>	1602
<i>Yukiko Asami-Johansson, Iiris Attorps and Anu Laine</i>	
<u>The lexicon project: Examining the consequences for international comparative research of pedagogical naming systems from different cultures</u>	1610
<i>David Clarke, Carmel Mesiti, Yiming Cao, & Jarmila Novotna</i>	
<u>A comparison of Kosovar and Polish pre-service teachers' knowledge of fractions</u>	1618
<i>Jeta Kingji-Kastrati, Mirosława Sajka and Eda Vula</i>	
<u>Finnish teaching materials in the hands of a Swedish teacher: The telling case of Cecilia</u>	1626
<i>Tuula Koljonen</i>	
<u>Algorithmics in secondary school: A comparative study between Ukraine And France</u>	1634
<i>Simon Modeste and Maryna Rafalska</i>	
<u>Ten years of mathematics education: Preparing for the supermarket?</u>	1642
<i>Mona Nosrati and Paul Andrews</i>	
<u>Visual attention while reading a multiple choice task by academics and students: A comparative eye-tracking approach</u>	1650
<i>Mirosława Sajka</i>	
<u>A cross-national study of lower secondary mathematics teachers' content knowledge in the USA and Russia</u>	1658
<i>Mourat Tchoshanov, Maria Cruz Quinones, Kadriya Shakirova, Elena Ibragimova and Liliana Shakirova</i>	
<u>Explanations as tools for evaluating content knowledge for teaching: A cross-national pilot study in Cyprus and Greece</u>	1666
<i>Constantinos Xenofontos and Paul Andrews</i>	
<u>Research on mathematical literacy in schools - Aim, approach and attention</u>	1674
<i>Frode Olav Haara, Oda Heidi Bolstad and Eirik S. Jenssen</i>	
<u>Kids Inspiring Kids for STEAM (KIKS)</u>	1676
<i>Maitane P. Istúriz, Ignacio González-Ruiz, Jose M. Diego-Mantecón, Tomás Recio, José B. Búa, Teresa F. Blanco, María J. González and Irene Polo</i>	
<u>The teaching and learning of relations and functions: A comparative study of Norwegian and Ethiopian textbooks</u>	1678
<i>Solomon A. Tesfamicael and Geir H. Botten and Øyvind A. Lundeby</i>	

TWG12: History in mathematics education	1680
<u>Introduction to the papers of TWG12:</u>	
<u>History in mathematics education</u>	1681
<u>Arithmetical problems in primary school: Ideas that circulated in São Paulo/Brazil in the end of the 19th century</u>	1685
<i>Luciane de Fatima Bertini and Andreia Fernandes de Souza</i>	
<u>Mathematics in the initial pre-service education of primary school teachers in Portugal: Analysis of Gabriel Gonçalves proposal for the concept of unit and its application in solving problems with decimals</u>	1693
<i>Rui Candeias</i>	
<u>Mathematical analysis of informal arguments: A case-study in teacher-training context</u>	1701
<i>Renaud Chorlay</i>	
<u>Primary source projects in an undergraduate mathematics classroom: A pilot case in a topology course</u>	1709
<i>Kathleen Clark, Daniel Otero and Nicholas A. Scoville</i>	
<u>A course in the philosophy of mathematics for future high school mathematics teachers</u>	1717
<i>Elizabeth de Freitas</i>	
<u>Variational strategies on the study of the existence and uniqueness theorem for ordinary differential equations</u>	1725
<i>Rodolfo Fallas-Soto and Ricardo Cantoral</i>	
<u>Understanding didactical conceptions through their history: A comparison of Brousseau's and Varga's experimentations</u>	1732
<i>Katalin Gosztonyi</i>	
<u>Historical methods for drawing anaglyphs in geometry teaching</u>	1740
<i>Rainer Kaenders and Ysette Weiss</i>	
<u>Teaching kinematics using mathematics history</u>	1748
<i>Alfredo Martínez, Olimpia Figueras and François Pluvinage</i>	
<u>The concept of infinity – different meanings through the centuries</u>	1756
<i>Regina D. Möller and Peter Collignon</i>	
<u>Analyzing some algebraic mistakes from a XVI century Spanish text and observing their persistence among present 10th grade students</u>	1764
<i>Antonio M. Oller-Marcén and Vicente Meavilla</i>	
<u>Multiple perspectives on working with original mathematical sources from the Edward Worth Library, Dublin</u>	1772
<i>Maurice O'Reilly</i>	

<u>Inquiry-based teaching approach in mathematics by using the history of mathematics: A case study</u>	1780
<i>Areti Panaoura</i>	
<u>Classification and resolution of the descriptive historical fraction problems</u>	1788
<i>Maria T. Sanz Garcia and Bernardo Gómez</i>	
<u>Mathematics at the Royal Danish Military Academy of 1830</u>	1796
<i>Asger Senbergs</i>	
<u>Design research with history in mathematics education</u>	1804
<i>Bjørn Smestad</i>	
<u>“Sickened by set theory?” – About New Math in German primary schools</u>	1812
<i>Tanja Hamann</i>	
<u>The role of genetic approach and history of mathematics in works of Russian mathematics educators (1850-1950)</u>	1814
<i>Ildar Safuanov</i>	
TWG13: Early years mathematics	1816
<u>Introduction to the papers of TWG13: Early years mathematics</u>	1817
<u>Aspects of numbers challenged in toddlers’ play and interaction</u>	1821
<i>Camilla Björklund</i>	
<u>Perception, cognition and measurement of verbal and non-verbal aspects of the cardinal concept in bodily-spatial interaction</u>	1829
<i>Morten Bjørnebye, Thorsteinn Sigurjonsson and Tor Solbakken</i>	
<u>Kindergarten children’s argumentation in reflection symmetry: The role of semiotic means</u>	1837
<i>Svanhild Breive</i>	
<u>Making numbers: Issues in using manipulatives with young children</u>	1845
<i>Sue Gifford, Rose Griffiths and Jenni Back</i>	
<u>A kindergarten teacher’s revealed knowledge in orchestration of mathematical activities</u>	1853
<i>Per Sigurd Hundeland, Ingvald Erfjord and Martin Carlsen</i>	
<u>Young children’s aesthetic development in the context of mathematical explanation</u>	1861
<i>Esther Levenson and Manya Raman-Sundström</i>	
<u>Discovering regularities in a geometrical objects environment</u>	1869
<i>Bozena Maj-Tatsis and Ewa Swoboda</i>	
<u>Combining historical, foundational, and developmental insights to build children’s first steps in mathematics</u>	1877
<i>Ana Millán Gasca, Elena Gil Clemente, Ilaria Colella</i>	

<u>How do preschool teachers characterize their own mathematics teaching in terms of design and content?</u>	1885
<i>Hanna Palmér and Camilla Björklund</i>	
<u>“Two, three and two more equals seven” – Preschoolers’ perception and use of structures in sets</u>	1893
<i>Priska Schöner and Christiane Benz</i>	
<u>A framework for designing inquiry-based activities (FIBA) for early childhood mathematics</u>	1901
<i>Chrysanthi Skoumpourdi</i>	
<u>The role of gestures in supporting mathematical communication for students with language delays</u>	1909
<i>Helen Thouless</i>	
<u>Preschool teachers’ variations when implementing a patterning task</u>	1917
<i>Dina Tirosh, Pessia Tsamir, Ruthi Barkai, and Esther Levenson</i>	
<u>Teaching intervention for developing generalization in early childhood: The case of measurement</u>	1925
<i>Marianna Tzekaki and Evangelia Papadopoulou</i>	
<u>Discussing school mathematical narratives in early childhood future teacher education</u>	1933
<i>Yuly Vanegas, Joaquín Giménez and Marjorie Samuel</i>	
<u>Early years mathematics learning – Comparing traditional and inclusive classroom settings</u>	1942
<i>Andrea Peter-Koop and Miriam M. Lüken</i>	
<u>Making maps in kindergarten</u>	1944
<i>Geir Olaf Pettersen and Monica Volden</i>	
<u>Learning of numerosity through a designed activity with dice and towers</u>	1946
<i>Reinert A. Rinvold</i>	
<u>Kindergarten class – inquiry and magnets</u>	1948
<i>Ana Filipa Silva, Conceição Costa and António Domingos</i>	
<u>Slow down, you move too fast!</u>	1950
<i>Jorryt van Bommel and Hanna Palmér</i>	

TWG14: University mathematics education	1952
<u>Introduction to the papers of TWG14:</u>	
<u>University mathematics education</u>	1953
<u>Undergraduates' reasoning while solving integration tasks: Discussion of a research framework</u>	1961
<i>Aaltje Berendina Aaten, Johan Deprez, Gerrit Roorda and Martin Goedhart</i>	
<u>A categorisation of the resources used by undergraduates when studying mathematics</u>	1969
<i>Marinos Anastasakis, Carol Robinson and Stephen Lerman</i>	
<u>An analysis of freshmen engineering students' notes during a preparatory mathematics course</u>	1977
<i>Chiara Andrà</i>	
<u>The transition from high school to university mathematics: A multidimensional process</u>	1985
<i>Amalia-Christina Bampili, Theodosios Zachariades and Charalampos Sakonidis</i>	
<u>"Points", "slopes" and "derivatives": Substantiations of narratives about tangent line in university mathematics students' discourses</u>	1993
<i>Irene Biza</i>	
<u>Teaching didactics to lecturers: A challenging field</u>	2001
<i>Ignasi Florensa, Marianna Bosch, Josep Gascón and Noemí Ruiz-Munzon</i>	
<u>High school teachers' choices concerning the teaching of real numbers: A case study</u>	2009
<i>Laura Branchetti</i>	
<u>Proof and formalism: The role of letters' logical status</u>	2017
<i>Faïza Chellougui</i>	
<u>A mathematics educator and a mathematician co-teaching mathematics – Affordances for teacher education</u>	2025
<i>Jason Cooper and Orit Zaslavsky</i>	
<u>The organization of study in French business school preparatory classes</u>	2033
<i>Lynn Farah</i>	
<u>How mathematicians conjecture and prove: An approach from mathematics education</u>	2041
<i>Aurora Fernández-León, Rocío Toscano-Barragán and José María Gavilán-Izquierdo</i>	
<u>Students' interpretation of the derivative in an economic context</u>	2049
<i>Frank Feudel</i>	
<u>Exploring tensions in a mathematical course for engineers utilizing a flipped classroom approach</u>	2057
<i>Helge Fredriksen, Said Hadjerrouit, John Monaghan and Ragnhild J.Rensaa</i>	
<u>A micro-model of didactical variables to explore the mathematical organization of complex numbers at upper secondary level</u>	2065
<i>Imène Ghedamsi</i>	

<u>How are Calculus notions used in engineering? An example with integrals and bending moments</u>	2073
<i>Alejandro S. González-Martín and Gisela Hernandes Gomes</i>	
<u>Students' view of continuity: An empirical analysis of mental images and their usage</u>	2081
<i>Erik Hanke and Ingolf Schäfer</i>	
<u>Using the theory of instrumental genesis to study students' work with a digital tool for applying integrals in a kinematic simulation</u>	2089
<i>Ninni Marie Hogstad and Ghislain Maurice Norbert Isabwe</i>	
<u>Investigating the discursive shift in the learning of Group Theory: Analysis of some interdiscursive commognitive conflicts</u>	2097
<i>Marios Ioannou</i>	
<u>Theorising university mathematics teaching: The teaching triad within an activity theory perspective</u>	2105
<i>Barbara Jaworski, Despina Potari and Georgia Petropoulou</i>	
<u>Praxeological analysis: The case of ideals in Ring Theory</u>	2113
<i>Julie Jovignot, Thomas Hausberger and Viviane Durand-Guerrier</i>	
<u>University students' understandings of concept relations and preferred representations of continuity and differentiability</u>	2121
<i>Kristina Juter</i>	
<u>Engineering mathematics between competence and calculation</u>	2129
<i>Birgit Griese and Michael Kallweit</i>	
<u>The association between engineering students' self-reported mathematical identities and average grades in mathematics courses</u>	2137
<i>Eivind Kaspersen, Birgit Pepin, and Svein Arne Sikko</i>	
<u>A praxeological approach to Klein's plan B: Cross-cutting from calculus to Fourier analysis</u>	2145
<i>Margo Kondratieva and Carl Winsløw</i>	
<u>The interface between mathematics and engineering – problem solving processes for an exercise on oscillating circuits using ordinary differential equations</u>	2153
<i>Jörg Kortemeyer and Rolf Biehler</i>	
<u>Self-efficacy of engineering students in the introductory phase of studies</u>	2161
<i>Ronja Kürten</i>	
<u>Q² game used in a task design of the double quantification</u>	2169
<i>Thomas Lecorre</i>	
<u>A framework for goal dimensions of mathematics learning support in universities</u>	2177
<i>Michael Liebendörfer, Reinhard Hochmuth, Rolf Biehler, Niclas Schaper, Christiane Kuklinski, Sarah Khellaf, Christoph Colberg, Mirko Schürmann, Lukas Rothe</i>	
<u>A vector is a line segment between two points? - Students' concept definitions of a vector during the transition from school to university</u>	2185
<i>Tobias Mai, Frank Feudel and Rolf Biehler</i>	

<u>What can calculus students like about and learn from a challenging problem they did not understand?</u>	2193
<i>Ofer Marmur and Boris Koichu</i>	
<u>“What you see and don’t see, shapes what you do and don’t do”: Noticing in first year mathematics lectures</u>	2201
<i>Maria Meehan, Ann O’Shea, and Sinéad Breen</i>	
<u>To be or not to be an inflection point</u>	2209
<i>Regina Ovodenko and Pessia Tsamir</i>	
<u>Math teaching as jazz improvisation: Exploring the ‘highly principled but not determinate’ instructional moves of an expert instructor</u>	2217
<i>Alon Pinto</i>	
<u>Identifying discussion patterns of teaching assistants in mathematical tutorials in Germany</u>	2225
<i>Juliane Püschi</i>	
<u>French engineers’ training and their mathematical needs in the workplace: Interlinking tools and reasoning</u>	2233
<i>Pierre-Vincent Quéré</i>	
<u>Approaches to learning of linear algebra among engineering students</u>	2241
<i>Ragnhild Johanne Rensaa</i>	
<u>Access to conceptual understanding – Summer courses for linear algebra and analysis after the first semester</u>	2250
<i>Kirsten Schmitz and Ingolf Schäfer</i>	
<u>Navigating through the mathematical world: Uncovering a geometer’s thought processes through his handouts and teaching journals</u>	2258
<i>Sepideh Stewart, Clarissa Thompson and Noel Brady</i>	
<u>Discursive shifts from school to university mathematics and lecturer assessment practices: Commognitive conflict regarding variables</u>	2266
<i>Athina Thoma and Elena Nardi</i>	
<u>From ritual to exploration: The evolution of biology students’ mathematical discourse through mathematical modelling activities</u>	2274
<i>Olov Lui Viirman and Elena Nardi</i>	
<u>Meta-representational competence with linear algebra in quantum mechanics</u>	2282
<i>Megan Wawro, Kevin Watson and Warren Christensen</i>	
<u>The impact of the teacher’s choices on students’ learning: The case of Riemann integral in the first year of preparatory classes</u>	2290
<i>Inen Akrouti and Sassi Haddad</i>	
<u>Interactive mathematical maps for de-fragmentation</u>	2292
<i>Anna-Maria Schwarz, Matthias Brandl, Tobias Kaiser and Andreas Datzmann</i>	
<u>In what ways do lecturers receive and use feedback from large first year mathematics classes?</u>	2294
<i>Anthony Cronin and Maria Meehan</i>	

<u>Measuring gains in knowledge within algebra instruction at community colleges: Assessing the efficacy of the Algebra Pre-Calculus Readiness (APCR) test</u>	2296
<i>Irene M. Duranczyk, Vilma Mesa, Nidhi Kohli, April Strom and Laura Watkins</i>	
<u>Reflection on didactical design for action: The cases of the convergence of sequences and of complex numbers</u>	2298
<i>Fatma Fattoum, Raja Tanazefi, Imène Ghedamsi</i>	
<u>Investigating students' difficulties with differential equations in physics</u>	2300
<i>Diarmaid Hyland, Paul van Kampen and Brien Nolan</i>	
<u>A practical study of a design of university mathematics courses for humanities and social sciences students</u>	2302
<i>Mitsuru Kawazoe and Masahiko Okamoto</i>	
<u>Connections between approximating irrationals by a sequence of rationals and introducing the notion of convergence</u>	2304
<i>Hichem Khechine and Alejandro González-Martín</i>	
<u>Unconventional didactical choices for the benefit of course instruction: A glimpse into a lecturer's decision-making</u>	2306
<i>Igor' Kontorovich</i>	
<u>Polynomial approximation: From history to teaching</u>	2308
<i>Rahim Kouki and Yassine Hachaïchi</i>	
<u>The flipped learning model in teaching abstract algebra</u>	2310
<i>Tore Alexander Forbregd and Magdalini Lada</i>	
<u>Mathematics and medicine: The socioepistemological roots of variation</u>	2312
<i>Angélica Moreno-Durazo and Ricardo Cantoral</i>	
<u>Developing conceptual knowledge by using ICT on mathematics lessons</u>	2314
<i>Mária Slavičková</i>	
<u>Heuristic strategies in mathematics teacher education</u>	2316
<i>Peter Stender</i>	
<u>Supporting university freshmen – an intervention to increase strategic knowledge</u>	2318
<i>Thomas Stenzel</i>	
<u>Teaching mathematics to non-mathematicians: The case of media technology undergraduate students</u>	2320
<i>Evangelia Triantafyllou and Olga Timcenko</i>	
<u>Getting into university: From foundation to first year engineering</u>	2322
<i>Stephanie Treffert-Thomas</i>	

TWG15: Teaching mathematics with resources and technology 2324

Introduction to the papers of TWG15:

Teaching mathematics with resources and technology 2325

- Real uses of ICT in classrooms: Tensions and disturbances in mathematics teachers' activity 2334
Maha Abboud and Janine Rogalski
- Out- and in-sourcing, an analysis model for the use of instrumented techniques 2342
Henrik P. Bang, Niels Grønbaek and Claus R. Larsen
- The development of pre-service teachers' TPACK for the use of digital tools 2350
Nimer Baya'a, Wajeeh Daher, Rawan Anabousy and Ahlam Anabousy
- Beyond a positive stance: Integrating technology is demanding on teachers' mathematical knowledge for teaching 2358
Nicola Bretscher
- What influences in-service and student teachers use of MathCityMap? 2366
Iwan Gurjanow, Matthias Ludwig and Joerg Zender
- Exploring a framework for technology integration in the mathematics classroom 2374
Patrik Gustafsson
- Preparing preservice teachers to use instructional technology: How much development can happen in one semester? 2382
Janet M. Herrelko
- Maths teachers' adventure of ICT integration: From an open online course towards an online teacher community 2390
Judith Hohenwarter Selay Arkün Kocadere and Markus Hohenwarter
- The effect of GeoGebra collaborative and iterative professional development on in-service secondary mathematics teachers' practices 2398
Houssam Kasti and Murad Jurdak
- "One of the beauties of Autograph is ... that you don't really have to think": Integration of resources in mathematics teaching 2406
Lina Kayali and Irene Biza
- Identifying and assessing quality criteria for dynamic mathematics materials on platforms 2414
Barbara Kimeswenger
- Teachers designing e-books to foster creative mathematical thinking: the case of curvature 2422
Angeliki Kolovou and Chronis Kynigos
- Planning geometry lessons with learning platforms 2430
Andreas Lindenskov Tamborg

<u>What can we assess using multiple choice problems that involve learner generated examples?</u>	2438
<i>Shai Olsher and Michal Yerushalmy</i>	
<u>Analysing MOOCs in terms of their potential for teacher collaboration: The French experience</u>	2446
<i>Monica Panero, Gilles Aldon, Jana Trgalová and Luc Trouche</i>	
<u>Using a flipped classroom approach in the teaching of mathematics: A case study of a preservice teachers' class</u>	2454
<i>Theodosia Prodromou</i>	
<u>'Walking a graph' – primary school students' experimental session on functions and graphs</u>	2462
<i>Svein Arne Sikko, Øistein Gjøvik, Jardar Cyvin, Maria I.M. Febri and Ragnhild L. Staberg</i>	
<u>PÉPITE Online automated assessment and student learning: The domain of equations in the 8th grade</u>	2470
<i>Stéphane Sirejacob, Françoise Chenevotot-Quentin and Brigitte Grugeon-Allys</i>	
<u>Analysing MOOCs in terms of their potential for teacher collaboration: The Italian experience</u>	2478
<i>Eugenia Taranto, Ferdinando Arzarello, Ornella Robutti, Virginia Alberti, Sara Labasin, Sara Gaido</i>	
<u>Coaching and engaging. Developing teaching with CAS in High School</u>	2486
<i>Henrik P. Bang, Niels Grønbaek and Claus R. Larsen</i>	
<u>A study of the development of mathematics student teachers' knowledge on the implementation of CAS in the teaching of mathematics -a praxeological analysis</u>	2488
<i>Louise Meier Carlsen</i>	
<u>A study investigating how mathematics teachers view and use tablets as a teaching tool</u>	2490
<i>Kinga Petrovai</i>	
<u>The role of automated reasoning of geometry statements in mathematics instruction</u>	2492
<i>Francisco Botana, Tomás Recio and M. Pilar Vélez</i>	
<u>A study of the Cornerstone Maths project teachers' classroom practices: Geometric similarity using the Cornerstone Maths software</u>	2494
<i>Ali Simsek and Nicola Bretscher</i>	
<u>Resource systems of English teachers as they appropriate mastery approaches</u>	2496
<i>Michael Achile Umameh</i>	

TWG16: Learning Mathematics with Technology and Other Resources **2498**

Introduction to the papers of TWG16: Learning Mathematics with Technology and Other Resources **2499**

- A computer-based collaboration script to mediate verbal argumentation in mathematics 2507
Giovannina Albano, Umberto Dello Iacono and Maria Alessandra Mariotti
- (Legitimate peripheral) computational thinking in mathematics 2515
Laura Broley, Chantal Buteau and Eric Muller
- Examining motivation in mobile app-supported math trail environments 2523
Adi Nur Cahyono and Matthias Ludwig
- Mathematical gestures: Multitouch technology and the indexical trace 2531
Elizabeth de Freitas and Nathalie Sinclair
- Learning mathematics with technology. A review of recent CERME research 2539
Ana Donevska-Todorova and Jana Trgalová
- Number, arithmetic, multiplicative thinking and coding 2547
Krista Francis and Brent Davis
- Investigating the integration of a digital resource in the mathematics classroom: The case of a creative electronic book on reflection 2555
Eirini Geraniou and Manolis Mavrikis
- Preliminary testing of apps in mathematics, based on international collaborative work 2563
Øistein Gjøvik and Iveta Kohanová
- Khan Academy as a resource for pre-service teachers: A controlled study 2571
James Gray, Christine Lindstrøm and Kristian Vestli
- Constructing the shortest path on a cylindrical surface 2579
Chronis Kynigos and Ioannis Zantzos
- Using dynamic worksheets to support functional thinking in lower secondary school 2587
Edith Lindenbauer and Zsolt Lavicza
- Students' use of movement in the exploration of dynamic functions 2595
Giulia Lisarelli
- Representing the one left over: A social semiotic perspective of students' use of screen casting 2603
Carol Murphy and Nigel Calder
- Interactive Virtual Math: A tool to support self-construction graphs by dynamic events 2611
Sonia Palha and Stephan Koopman

<u>Meaning-generation through an interplay between problem solving and constructionism in the C-book technology environment</u>	2619
<i>Ioannis Papadopoulos, Dimitris Diamantidis, and Chronis Kynigos</i>	
<u>Three ways that use ICT to enlarge students' roles in learning</u>	2627
<i>Jean-Jacques Salome</i>	
<u>Nature and characteristics of digital discourse in mathematical construction tasks</u>	2636
<i>Florian Schacht</i>	
<u>Using dynamic and interactive technological tools to support conceptual learning of equations among low-achieving students</u>	2644
<i>Osama Swidan and Wajeeh Daher and Nael Darawsha</i>	
<u>Students' reasoning on linear transformations in a DGS: A semiotic perspective</u>	2652
<i>Melih Turgut</i>	
<u>Research on the language barriers of students who use Khan Academy as a mathematics homework platform</u>	2660
<i>Jiří Vančura</i>	
<u>When students use podcasts to share their own expertise in building proofs</u>	2668
<i>Martine De Vleeschouwer and Marie-Ange Remiche</i>	
<u>Identifying the reasons behind students' engagement patterns</u>	2670
<i>Emma Howard, Maria Meehan and Andrew Parnell</i>	
<u>Using tangible technology to multimodally support algebra learning: The MAL project</u>	2672
<i>Thomas Janßen, David Reid, Angelika Bikner-Ahsbabs, Anke Reinschlüssel, Tanja Döring, Dmitry Alexandrovsky, Rainer Malaka and Estela Vallejo</i>	
<u>Self-assessment and achievement in mathematics education: The influence of immediate feedback included in a computer-based learning environment.</u>	
<u>Concept of a research study</u>	2674
<i>Elena Jedtke and Gilbert Greefrath</i>	
<u>Technology enhanced Resources for Mathematics Education (TeRMEd)</u>	2676
<i>Ann O'Shea, Sinéad Breen, Connor Brennan, Frank Doheny, Fiona Lawless, Christine Kelly, Ciarán Mac an Bhaird, Seamus McLoone, Eabhnat Ní Fhloinn, Caitríona Ní Shé and Brien Nolan.</i>	
<u>Real materials or simulations? Searching for a way to foster functional thinking</u>	2678
<i>Michaela Scheuring and Jürgen Roth</i>	
<u>The development of the mathematics curriculum in basic education with technology</u>	2680
<i>Manuela Subtil and António Domingos</i>	

**TWG17: Theoretical perspectives and approaches
in mathematics education research** **2682**

**Introduction to the papers of TWG17: Theoretical perspectives
and approaches in mathematics education research** **2683**

Abstraction in Context and Documenting Collective Activity 2692
Michal Tabach, Chris Rasmussen, Tommy Dreyfus and Rina Hershkowitz

Meta-theoretical aspects of the two case studies of networking theoretical perspectives:
Focusing on the treatments of theoretical terms in different networking strategies 2700
Yusuke Shinno

On dialectic and dynamic links between the Mathematical Working
Space model and practice in the teaching and learning of mathematics 2702
Alain Kuzniak and Assia Nechache

The Mathematical Working Space model: An open and adaptable
theoretical framework? 2710
Charlotte Derouet, Alain Kuzniak, Assia Nechache, Bernard Parzys, Laurent Vivier

Learning research in a laboratory classroom: Complementarity and
commensurability in juxtaposing multiple interpretive accounts 2713
Man Ching Esther Chan and David Clarke

The perspective of indexicality: How tool-based actions and gestures
contribute to concept-building 2721
Daniela Behrens and Angelika Bikner-Ahsbals

Towards argumentative grammars of design research 2730
Arthur Bakker

When a critical aspect is a conception: Using multiple theories to design
dynamic computer environments and tasks to promote secondary students'
discernment of covariation 2738
*Heather Lynn Johnson, Evan McClintock, Peter Hornbein, Amber Gardner
and Daniel Grieser*

Combining two theories in the design for learning about integrals 2746
Anatoli Kouropatov and Tommy Dreyfus

Learning Through Activity: A developing integrated theory of
mathematics learning and teaching 2754
Martin A. Simon

'Grundvorstellungen' and their application to the concept of extreme points 2763
Anna-Katharina Roos

Mathematics teachers' re-sourcing and use of social media:
Can the 'prosumer' concept convey what's going on? 2771

TWG20: Mathematics teacher knowledge, beliefs and identity 3219

Introduction to the papers of TWG20:

Mathematics teacher knowledge, beliefs, and identity 3220

The reasons underlying mathematics teachers' decisions about the teaching objectives of a mathematical task 3224

Miriam Amit and Hodaya (Liora) Hoch

Differences in the forms of content teachers are seen to offer over time: Identifying opportunities for teacher growth 3232

Nick Andrews

How do prospective teachers imagine mathematical discussions on fraction comparison? 3240

Kristin Krogh Arnesen, Ole Enge, Yvonne Grimeland and Torkel Haugan Hansen

A novice high school teacher's perception on the effect of content course taken as preservice 3248

Fatma Aslan-Tutak and Tugay Durak

Study of primary school teacher's practices for a lesson after a Lesson Study process in mathematics 3256

Valérie Batteau

Developing student teachers' professional knowledge of low attainments' support by "learning-teaching-laboratories" 3264

Ralf Benölken

Didactic assessment over a final work of a master for mathematics teachers in service 3272

Adriana Breda, Luis R. Pino-Fan, Vicenç Font, Valderez Marina do Rosário Lima

Describing a secondary mathematics teacher's specialised knowledge of functions 3280

Dinazar Escudero-Avila, Eric Flores-Medrano, and José Carrillo

Use of analogies in teaching the concept of function: Relation between knowledge of topics and knowledge of mathematics teaching 3288

Gonzalo Espinoza-Vásquez, Diana Zakaryan and José Carrillo Yañez

Pre-service teachers using the Knowledge Quartet as a tool to analyse and reflect on their own teaching 3296

Sindre Syversen Flesvig, Tim Rowland and Elisabeta Eriksen

Subject professional association activity: What can it offer teachers of mathematics and their students? 3304

Jennie Golding

Subject matter knowledge and pedagogical content knowledge in the learning diaries of prospective mathematics teachers 3312

Jani Hannula

<u>The role of definitions on classification of solids including (non)prototype examples: The case of cylinder and prism</u>	3320
<i>Mine Işıksal-Bostan and Seçil Yemen-Karpuzcu</i>	
<u>Preparing teachers for teaching: Does initial teacher education improve mathematical knowledge for teaching?</u>	3328
<i>Dun Nkhoma Kasoka, Arne Jakobsen and Mercy Kazima</i>	
<u>A preservice secondary school teacher's pedagogical content knowledge for teaching algebra</u>	3336
<i>Florence Mamba, Reidar Mosvold, and Raymond Bjuland</i>	
<u>Analysis of mathematics standardized tests: Examples of tasks for teachers</u>	3344
<i>Francesca Martignone</i>	
<u>An exploration of challenges of engaging students in generative interaction with diagrams during geometric proving</u>	3352
<i>Lisnet Mwadzaangati</i>	
<u>An investigation of middle school mathematics teachers' knowledge for teaching algebra</u>	3360
<i>Nurbanu Yilmaz and Ayhan Kürşat Erbaş</i>	
<u>Is teacher knowledge affecting students' transition from primary to second-level mathematics education?</u>	3368
<i>Niamh O'Meara, Mark Prendergast, Lorraine Harbison and Clare O'Hara</i>	
<u>Intertwining noticing and knowledge in video analysis of self practice: The case of Carla</u>	3376
<i>Miguel Ribeiro, Edelmira Badillo, Glória Sánchez-Matamoros, Miguel Montes, Genaro de Gamboa</i>	
<u>Investigating Lesson Study as a practice-based approach to study the development of mathematics teachers' professional practice</u>	3384
<i>Anita Tyskerud, Janne Fauskanger, Reidar Mosvold, & Raymond Bjuland</i>	
<u>First year student teachers dealing with non-routine questions in the context of the entrance examination to a degree in Primary Education1</u>	3392
<i>Aitor Villarreal, Lluís Albarracín and Núria Gorgorió</i>	
<u>Anticipating students' thinking through Lesson Study: A case study with three prospective middle school mathematics teachers</u>	3400
<i>Nadide Yilmaz, İ. Elif Yetkin Özdemir and Bülent Çetinkaya</i>	
<u>Mathematics teachers' knowledge and professional development in a Lesson Study context</u>	3408
<i>Vanessa Crecci, Miguel Ribeiro, Dario Fiorentini</i>	
<u>Combining two frameworks: A new perspective on mathematics teacher knowledge</u>	3410
<i>Knud Thorbjørn Sloth and Ingi Heinesen Højsted</i>	
<u>Teachable moments at elementary school mathematics level</u>	3412
<i>Amanjot Toor and Joyce Mgombelo</i>	

TWG21: Assessment in mathematics education	3414
