# FOREWORD

The International Conference on Advanced Visual Interfaces (AVI) is a biannual scientific event on the field of Human-Computer Interaction (HCI) that is organized every two years since 1992 in Italy. The scope of the AVI conference encompasses a large spectrum of topics describing advances on technology and new possibilities for user interaction. In addition to contributions reporting the design, implementation and evaluation of novel visual interfaces, AVI welcome researchers presenting technological results, paradigms, and visions of HCI and user interfaces.

While rooted in Italy, AVI is a true international conference with respect to nationality of participants, authors of papers and program committee members. The mixture of carefully selected research contributions paired with cordial Italian hospitality creates a unique conference atmosphere, which has made AVI an internationally recognized brand.

The AVI conference is held in cooperation with the Special Interest Groups (SIG) of the Association for Computing Machinery (ACM): ACM SIGCHI (on Computer Human Interaction), ACM SIGMM (on Multimedia), and ACM SIGWEB (on Hypertext and the Web). The conference proceedings are published by ACM Press and available in the ACM Digital Library. This conference also complies the Code of Conduct abides by ACM Code of Ethics and Policy against Harassment.

AVI 2020 was originally planned to run from June 8-12<sup>th</sup>, 2020, at the island of Ischia in the Gulf of Naples, Italy. Very unfortunately, due to the outbreak of the Covid-19 and the dramatic consequences of the pandemic that followed, the conference was postponed and, by the time of the writing of these proceedings, the AVI conference is confirmed to run from September 28<sup>th</sup> to October 2<sup>nd</sup> 2020.

AVI 2020 received 123 submissions of which were accepted 36 full papers (representing 29% acceptance rate) and 30 short papers (24% acceptance rate). In addition to that, AVI 2020 received 32 contributions as demo/posters. All these contributions have been rigorously peer-reviewed by the international program committee. The top ranked submissions were granted with the best paper award (1% of total submissions) and honorable mention award (6% of total submissions).

The program of the AVI 2020 also includes three international keynotes:

- Margaret Burnett, School of EECS, Oregon State University, United States of America.
- Philippe Palanque, ICS-IRIT, Université Toulouse 3 – Paul Sabatier, Toulouse, France.
- Albrecht Schmidt, Ludwig-Maximilians-Universität München, Germany.

We would like to express our gratitude to those who supported AVI 2020 in many different ways. It is worthy of notice that the reviewing process was accomplished during a period of the uncertainty and we congratulate everyone for the motivation to carry on the work during the period of lockdown. Our special thought of gratitude for the chairs of tracks Full Papers (Maria De Marsico and Ignacio Aedo), Short Paper (Francesco Leotta and Carla Maria Dal Sasso Freitas), Posters & Demo (Silvio Barra and Marco Romano), Workshop (Monica Sebillio and Shah Rukh Humayoun), Tutorial (Rosa Lanzilotti and Helen C. Purchase), Associated Chairs, Program Committee members, and all the reviewers who not only help with the selection of high quality scientific contributions but also provided valuable advices to improve the work of authors. We extend our recognition of hard work to the Publicity Chair (Rita Francese), the Local Arrangements Chair (Paola De Roberto) who worked twice to make AVI happen after the changes in the dates, and the AVI Steering Committee for the valuable advices. Thanks to Michele Nappi who is organizing two special issues for selected papers of AVI 2020. Last, but not least, our sincere gratitude to the keynotes and all the attendees of AVI 2020.
