

3rd CEAS Air & Space Conference

• 21st AIDAA Congress

24/28 October 2011

San Giorgio Maggiore Island - Venice, Italy

CEAS
2011

AIDAA

proceedings sponsored by

CEAS 2011 Post-Conference Proceedings

Published by Con-fine Ed. Monghidoro (BO) Italy

ISBN 978-88-96427-42-2

Monday October 24th	4
Guidance, Navigation and Control	3
Design of an U.A.V. controller based on the open source platform Arduino <i>F. Rinaldi, F. Quagliotti, S. Chiesa</i>	4
UAV Guidance Law for Trajectory Tracking of a Normalised Lemniscate <i>N. Regina, M. Zanzi</i>	11
Autonomous Take Off System: Development and Experimental Validation <i>N. Genito, E. De Lellis, V. Di Vito, L. Garbarino, C. Marrone</i>	19
Analysis of IMU error compensation based on rotating fiber strap-down inertial navigation system <i>Z. Ling, L. Jianye, L. Jizhou, L. Pin</i>	29
Aviation Operations	36
Environmental impact assessment of aircraft operation: A key for greening the aviation sector <i>H. Krieg, R. Ilg</i>	37
Analysis of Rates of Aircraft Operational Effectiveness <i>J. Żurek, M. Zieja</i>	44
Visionary Concepts for Future European Seaplane Operations <i>G. Gobbi, L. Smrcek, R. Galbraith, A. Canamar, J. Halirova</i>	53
Airports of the future <i>M. Noyelle</i>	63
Experimental Setup in Aerodynamics	71
Experimental and Numerical Investigations of Vortex Generator Jets for Active Flow Control at High Reynolds numbers <i>M. Casper, S. Mahmood, P. Scholz, R. Radespiel</i>	72
An experimental case study of an Air Outlet: Drag components and Efficiency parameters <i>T. Gericke, P. Scholz, R. Radespiel</i>	82
Wing-Tip Shape and the Axial Flow Structure in Wing-Tip Vortices <i>R. M. Buffo, R. Hoernschemeyer</i>	90
CFD Applications 1	100
CFD analysis of wind tunnel flow in open section model rotor tests <i>M. Biava, L. Vigevano</i>	101
Validation of numerical models for the investigation of the dynamic stall phenomenon <i>R. Nilifard, A. Guardone, G. Quaranta, A. Zanotti, G. Gibertini</i>	111
Experimental-Numerical study of small amplitude oscillations of a pitching airfoil <i>S. De Bernardi, G. Gibertini, A. Guardone, V. Motta, R. Nilifard, , G. Quaranta, A. Zanotti</i>	118

Aerodynamics of the Coaxial Rotors of a rotary wing MAV: Numerical and Experimental Investigation <i>D. Ferrari, M. Boffadossi</i>	129
Crack Propagation and Crashworthiness	137
Hierarchical BEM for dynamic analysis of anisotropic 3-D cracked solids <i>A. Milazzo, I. Benedetti, M. H. Aliabadi</i>	138
Experimental and numerical correlation of an helicopter subfloor crashworthiness <i>M. Anghileri, A. Milanese, A. Surini, M. Nicolotti, F. Invernizzi</i>	148
Linear Delamination Growth Initiation Prediction Tool for Stiffened Composite Panels <i>F. Di Caprio, A. Riccio, L. Iuspa, F. Scaramuzzino</i>	156
UAS 1	166
Innovative Unmanned Aircrafts: role and constraints for GMES applications <i>E. Cestino, G. Romeo</i>	167
SAMONIT - Polish Research Program For Development of an Advanced Aerial Surveillance System <i>Z. Goraj, M. Rodzewicz, W. Grendysa, M. Jonas, C. Górnjak, J. Hajduk</i>	178
Dynamics-Aided Inertial Navigation for a UAV during GPS outage <i>L. Pin, L. Jianye, L. Jizhou, Z. Ling</i>	186
Mathematical Model of Unmanned Aircraft In Ground Effect for Optimal Collision Avoidance <i>C. Grillo</i>	193
Space and Sensors	198
Design and testing of a miniaturized Fourier transform infrared spectrometer for Mars observation <i>B. Saggini, D. Scaccabarozzi, M. Tarabini, G. Bellucci</i>	199
Uncertainty experimental evaluation of the Mercury surface reconstruction for the SYMBIO-SIS stereo camera <i>M. Pertile, A. Aboudan, G. Colombatti, S. Debei</i>	206
Uncertainty evaluation and calibration of a vision-based system for displacement and rotation measurement in planetary exploration space missions <i>M. Pertile, S. Debei</i>	215
Space Missions Design and Modeling	223
ISS: first step in the Human Space Exploration <i>P. Messidoro, C. Ferro, E. Gargioli</i>	224
Solar Array Simulators for Low Power Space Missions <i>F. Topputo, F. Bernelli-Zazzera, F. Ercoli-Finzi, F. Lazzari</i>	243

Thermal modelling and testing of the baffles of SIMBIO-SYS scientific suite of BepiColombo <i>E.Friso, C.Bettanini, F.Cucciarrè, P.Ramous, M.Zaccariotto, S.Debei, I.Ficai, Veltroni, M.Rossi</i>	251
UML modeling procedure for anticipating cost at system level design <i>G. Belvedere, P. Gaudenzi</i>	259
Poster Session	269
Numerical Study of Flow Separation in Advanced Nozzles <i>F. Scaramuzzino, E. Martelli, F. Nasuti</i>	270
Numerical Studies of Nonlinear Aeroelastic Characteristics of Aircraft in Transonic Flow <i>S. I. Kuzmina, F. Z. Ishmuratov, O. V. Karas</i>	278
Using behavior based algorithms for missions of multiple UAVs providing pictures for a three-dimensional visualization <i>J. Holsten, P. Hartmann, D. Moormann</i>	286
Prediction of complete helicopter aerodynamics at low- and high-speed conditions <i>M. Biava, L. Vigevano</i>	294
Stress Analysis of the RASAT Satellite Structure Considering Vibration Induced Loads during Launch <i>S. Ontaç, S. Dağ, M. İ. Gökler</i>	305
Computational evaluation and exploration of combustion performance for liquid jet fuels derived from biomass <i>N. M. Mazlan, M. Savill, T. Kipouros</i>	314
A Boundary Element Model for Piezoelectric Dynamic Strain Sensing of Cracked Structures <i>A. Alaimo, G. Davì, A. Milazzo, C. Orlando</i>	324
Future-oriented C4ISTAR applications. UAS versus manned aircraft. Merit analysis to consider performance/cost aspects <i>S. Chiesa, N. Viola, G.A. Di Meo, M. Fioriti, G. Mastrodomenico</i>	332
Electrodynamic Tethers for Deorbiting Maneuvers <i>D. Zanutto, G. Colombatti, E. C. Lorenzini</i>	343
Linearized theory of supersonic potential flow: recent results of studies on Volterra's equation and its applications <i>L. Polito</i>	353
The Influence of Load Factors on the Turn Manoeuvres of Agricultural Aircraft: An Overview <i>B. Rasuo</i>	359
Benchmark Study of High Speed External Flow over Rotating Missile-Like Body using First- and Second-Order Turbulence Models	363

Index

<i>A. Ridluan, W. Charubhun, P. Chusilp</i>	
An attitude testbed for satellite formation flying research <i>A. Caon, M. Cesaro, E.C. Lorenzini</i>	373
Safety Aspects of Light Aircraft Spin Resistance Concept <i>R. Hankers, F. Pätzold, T. Rausch, S. Schönhals, R. Kickert, M. Cremer, J. Troelsen</i>	380
A procedure for the cost modeling assessment of a launcher <i>L. Visconti, P. Gaudenzi, M. Bocciarelli</i>	387
Conceptual Design Of An Aeroelastic Fly-By-Wire Aircraft With Manned Flight Simulation In The Optimization Loop <i>F. Bocola, P. Masarati, G. Quaranta</i>	397
Testing of multi layer insulators in martian-like environment <i>D. Scaccabarozzi, B. Saggin, M. Tarabini</i>	407
Parameterized Automated Generic Model for Aircraft Wing Structural Design and Mesh Generation for Finite Element Analysis <i>M. Sohaib</i>	413
SMAT – An Advanced Land and Environment Monitoring System <i>S. Maddaluno, B. Tranchero, M. Fornaiolo</i>	421
Analysis of drop nose concept with 1D fem models <i>F. Miglioretti, E. Carrera</i>	427
Low Temperature Gas Generator Propellants <i>R. Puccio, F. Maggi, G. Colombo, L. T. De Luca, R. De Amicis</i>	435
Atmospheric modeling by SCRAT experiment during the 2010 ESA BEXUS 10 Flight Campaign <i>G. Rodeghiero, L. Olivieri, A. Francesconi</i>	443
Anti-contamination by biochemically active structures <i>U. Reidt, C. Heller, H. Maier-Boetzel, L. Chancé, K. Bauer</i>	453
Fatigue crack propagation through adhesively bonded stiffened panels: a model to describe the skin crack behavior underneath the stiffeners <i>N. Gioia, G. Molinari, I. Meneghin, G. Ivetic, E. Troiani</i>	460
Large Attitude Maneuvers of a Spacecraft with Flexible Solar Panels <i>E. Paolini, F. Curti, M. Parisse, M. Battilana</i>	465
Fast and Accurate Numerical Integration of Relative Motion in Spacecraft Formation Flying <i>G. Baiù, A. Valmorbida, E. Lorenzini, A. Francesconi</i>	475
A critical incident in the cockpit: Analysis of a critical incident interview using the Leximancer™ tool <i>K. L. Plant, N. A. Stanton</i>	486
Tuesday October 25th	6; 8
Propulsion	497
Integration of CFD Tools in Aerodynamic Design of Contra-Rotating Propeller	498

Blades	
	<i>S. Béchet, C. A. Negulescu, V. Chapin, F. Simon</i>
Turbojet Steady State and Transient Analytical Model Development and Validation	508
	<i>G. Medici, S. Chiesa, S. Corpino, M. Balbo, A. Sbuttoni</i>
Optimization of a 100 daN Small Turbojet	518
	<i>J. A. Popescu, V. A. Vilag, C. F. Cuciumita, G. Vizitiu, V. Silivestru</i>
Piston engine cooling: an evergreen problem	527
	<i>L. Piancastelli, G. Caligiana, L. Frizziero, S. Marcoppido</i>
Collision Avoidance for Autonomous Vehicles	537
Flight Demonstration of Radar-based Autonomous Non-cooperative UAS Collision Avoidance	538
	<i>G. Fasano, D. Accardo, L. Forlenza, A. Moccia, S. Luongo, V. Di Vito</i>
Strategies for Improving the Electro-Optical Object Detection SW of an Integrated Sense and Avoid System	548
	<i>L. Forlenza, D. Accardo</i>
Sense & Avoid Algorithm based on Aircraft Performances Estimation	556
	<i>M. Melega, S. Lazarus, A. Savvaris</i>
Route Planning Under Uncertainty For a Lighter Than Air Robot in Bridge Monitoring	566
	<i>Y. Bestaoui, N. Ait Taleb, S. Oukid</i>
Design Methods and Aerodynamics Configurations	576
Aerodynamic guidelines in the design and optimization of new regional turboprop aircraft	577
	<i>F. Nicolosi, P. Della Vecchia</i>
Parametric Modelling of Aerodynamic Objects - The Key to Successful Design and Optimisation	588
	<i>W. Stalewski</i>
Enhancement of CEASIOM with Rapid-Meshing Tool for Aircraft Conceptual Design	597
	<i>M. Zhang, A. Rizzi, D. Raymer</i>
Convergence Acceleration of the CFD code Edge by LU-SGS	606
	<i>E. Otero, P. Eliasson</i>
Aeroelasticity	614
Structural and Aeroelastic Modeling of Curved Rotor Blades Using a Galerkin Approach	615
	<i>E. Piccione, G. Bernardini, M. Molica Colella, M. Gennaretti</i>
Influence of High Performance Computing on Aeroelasticity and Structural Dynamics	625
	<i>F. Sanchez-Zabala, M. Oliver, H. Climent</i>
Experimental and numerical investigation of freeplay on a T-tail	627

<i>S. Fichera, G. Quarantay, S. Ricci</i>	
Robust aeroservoelastic analysis for the investigation of rotorcraft pilot couplings <i>V. Muscarello, P. Masarati, G. Quaranta</i>	639
ATM Airport Operations 1	651
Flight testing of noise abating RNP procedures and steep approaches <i>H. H. Toeppen, V. Mollwitz, B. Korn, D. Kügler</i>	652
Real Time ATC simulation of Time Based CDA operations <i>R. de Muynck, T. Bos, A. Kuenz, C. Edinger, L. Rappich, S. Törner</i>	659
Airport Operations Simulation using Particle Swarm Optimization <i>S. Bagassi, D. Francia, F. Persiani</i>	667
Biofuels and Bioenergy	674
Bioenergy in Aviation: The Question of Land Availability, Yields and True Sustainability <i>F. Riegel, J. Steinsdörfer</i>	675
Object-Orientated Development of a Model Library for Fuel Cell Cooling Systems Using Modelica <i>E. Vredenburg, H. Lüdders, J. Grymlas, F. Thielecke</i>	682
Hybrid Fuel Cell-based emergency power architecture for commercial aircrafts <i>M. M. Prats, C. Lavoie</i>	692
Methods for Preliminary Design	701
Development of a Software for Aircraft Preliminary Design and Analysis <i>F. Nicolosi, G. Paduano</i>	702
Whole Aircraft Simulation for System Design and Optimisation in Preliminary Design <i>P. Krus</i>	715
Parametric wing profile description for conceptual design <i>T. Melin, K. Amadori, P. Krus</i>	723
An Integrated Method for Determination of the Oswald Factor in a Multi-Fidelity Design Environment <i>D. Böhnke, J. Jepsen, T. Pfeiffer, B. Nagel, V. Gollnick, C. Liersch</i>	735
UAS 2	744
All electric Secondary Power System for future advanced MALE UAV <i>S. Chiesa, S. Farfaglia, N. Viola, M. Fioriti</i>	745
Flight tests of solar powered light UAS for very long endurance autonomous flight of solar and fuel cells powered UAV <i>G. Romeo, M. Pacino, F. Borello</i>	755
The return of Diesel engine in the aeronautic propulsion <i>M. Varetti, S. Bagassi</i>	765

Flight Dynamics and Flight Testing	772
Gyroplane Longitudinal Flight Dynamics	773
<i>H. Duda, I. Pruter, C. Deiler, H. Oertel, A. Zach</i>	
On Some Trim Strategies for Nonlinear Aircraft Flight Dynamics Models with the Open Source Software JSBSim	784
<i>J. M. Goppert, I. Hwang, A. De Marco</i>	
Flutter Certification of SKYCAR Aircraft: Rational Analysis and Flight Tests	800
<i>R. Pecora, M. Pecora, L. Lecce, G. Verde</i>	
Materials 1	809
Flow analysis during Resin Transfer Molding of thick structures	810
<i>S. Laurenzi, M. Pinna, A. Grilli, M. Marchetti</i>	
Reinforcements of CFRP laminates through polymer nanofibers produced by means of electrospinning process	815
<i>R. Palazzetti, A. Zucchelli, L. Donati, G. Minak, E. Troiani, C. Gualandi, M. L. Focarete, M. Parente</i>	
Infrared Thermography in Aeronautics	823
<i>G. M. Carlomagno</i>	
Advancements in Fluid-Dynamics 1	825
Kinetic Dynamics for Reactive Wave Propagation Problems	826
<i>G. M. Kremer, M. Pandolfi Bianchi, A. Jacinta Soares</i>	
Numerical experiments on the polygonalization of converging shock waves by means of aerodynamic obstacles	835
<i>F. Vignati, A. Guardone</i>	
Experimental and Numerical Investigation on the MHD Interaction in a Hypersonic Plasma Flow	843
<i>A. Cristofolini, C. A. Borghi, G. Neretti, F. Roveda, A. Passaro, D. Baccarella</i>	
Turbines, Fans and Compressors	853
Improvements in performance estimation of wind turbine blade airfoils at low Reynolds number	854
<i>E. Daniele, F. Nicolosi, D. P. Coiro</i>	
Thermal Cycle Analysis of Constant Volume Combustion Gas Turbine Engine	864
<i>R. Andriani, U. Ghezzi, F. Gamma, A. Agresta</i>	
Human Factors and Safety	870
Further Investigation into Landing Flare Guidance Using the Optical Parameter Tau	871
<i>Garnet R. Ridgway, Michael Jump</i>	
User-Centered-Design of a Human-Machine-Interface for the Tower Controller	883
<i>J. Bergner, C. Schmand, T. Hofmann, C. König, H. Ebert</i>	

Towards a Wake Encounter Avoidance and Advisory System (WEAA) – Conceptual Design and First Implementations <i>T. Bauer, D. Vehtel</i>	892
New Configurations	902
Recent Developments of the FanWing Aircraft <i>G. R Seyfang</i>	903
The Conflict of Aerodynamic Efficiency and Static Longitudinal Stability of Box Wing Aircraft <i>D. Schiktanz, D. Scholz</i>	910
NeoCASS+, A Conceptual Design and Simulation Framework for Morphing Aircraft <i>L. Cavagna, A. De Gaspari, S. Ricci, L. Riccobene</i>	922
Modelling and Simulation 1	934
On Numerical Modeling of DBD Multi-Actuator System <i>S. Chernyshev, A. Kuryachii, D. Rusyanov, V. Skvortsov</i>	935
A Re-Analysis Procedure for Substructured Dynamics Finite Element Models <i>F. Macri, S. Ricci</i>	944
A procedure for establishing an approximate helicopter performance mode <i>M. Sethson</i>	952
Development of Neural Networks for Air Data Estimation Training of Neural Network Using Noise-Corrupted Data <i>M. Battipede, P. A. Gili, A. Lerro, S. Caselle, P. Gianardi</i>	960
Space Robots and Manipulators	970
Decentralized Walking Control for a Hexapod Robot for Space Exploration using Dynamical Neural Networks <i>M. Massari</i>	971
Autonomous Capture of Non-Cooperative Spacecraft with a Space Free-Flyer <i>C. Guariniello, L. Ansalone, F. Curti</i>	981
Bidirectional Converter for Single-Cell Li-Ion Batteries in a Moon Rover <i>M. Macellari, L. Schirone</i>	991
Contact forces optimization of a bio-inspired climbing robot <i>I. Pretto, Y. Li, S. Cocuzza, S. Debei, C. Menon</i>	999
Materials 2	1007
Design and optimization of Radar Absorbing Structure using carbon nanostructured composite materials <i>D. Micheli, C. Apollo, R. Pastore, S. Laurenzi, R. Bueno Morles, D. Barbera, M. Marchetti</i>	1008
Analytical solution for the dynamic analysis of magneto-electro-elastic laminated beams	1017

<i>A. Milazzo</i>	
Dynamic Analysis of Magneto-Electro-Elastic Structures by a Meshless Approach	1027
<i>G. Davì, A. Milazzo</i>	
The Effect of Laser Shock Peening on Fatigue Behaviour of Aluminium Alloy 6082-T6	1036
<i>S. Crestani, G. Ivetic, I. Meneghin, E. Troiani</i>	
Solid Propellants and Launchers	1041
Relative comparison of additives-filled solid fuels and grain geometry effects on regression rate in hybrid rocket propulsion	1042
<i>L. Galfetti, L. T. De Luca, F. Maggi, L. Merotto, M. Boiocchi</i>	
Random packing for propellant microstructure simulation	1051
<i>A. Baietta, F. Maggi, L. T. De Luca</i>	
New robust design guideline for imperfection sensitive composite launcher structures	1061
<i>R. Degenhardt</i>	
New Concepts and Rapid Prototyping	1068
Construction of a CUBESAT using Additive Manufacturing	1069
<i>F. Cevolini, W. Holemans, A. Huang, G. Moore, S. Davis</i>	
Conceptual design of a rechargeable air thruster for small aerial vehicles	1076
<i>L. Olivieri, M. Chiaradia, G. Rodeghiero, A. Francesconi</i>	
Functional analysis and Rapid Manufacturing of redesigned nanosatellites	1085
<i>F. De Crescenzo, M. Fantini, F. Piergentili, F. Persiani, F. Santoni</i>	
Wednesday October 26th	1098
Airspace Design and Optimization	1099
Operational Feasibility of Sectorless ATM	1100
<i>M. Biella, B. Birkmeier, B. Korn, C. Edinger, S. Tittel, D. Kügler</i>	
Algorithms and tools for dynamic airspace configuration based on genetic approach	1110
<i>K. Veresov</i>	
Universal algorithm and program tools of 4D flight plan synthesis under conditions of dynamic special use airspace	1117
<i>E. Filenkova</i>	
Fatigue and Damage Tolerance	1125
Numerical Evaluation of the Compressive Residual Strength in Impact-Damaged Composite Laminates	1126
<i>A. Baldi, A. Airoidi, M. Crespi, P. G. Nettuno, G. Sala</i>	
Design Methodology of Damage Tolerant Stiffened Composite Panels with Minimum Cost	1138
<i>M. Corvino, L. Iuspa, A. Riccio, F. Scaramuzzino</i>	

Fatigue Behavior of Composite Stiffened Components Working in Post-buckling <i>D. Zou, C. Bisagni</i>	1147
A three-dimensional damage model to simulate the progressive failure of composite structures <i>D. Fanteria, G. Longo</i>	1156
Modeling and Simulation 2	1166
Numerical Design of Leading Edge Flow Control over Swept High-Lift Airfoil <i>S. Mahmood, P. Scholz, R. Radespiel</i>	1167
A Straight Wing and a Forward Swept Wing Compared with a Curved Planform Wing in the Transonic Regime <i>M. R. Chiarelli, G. Lombardi, A. Nibio</i>	1175
Transient Spoiler Aerodynamics using a conservative adaptive-grid ALE scheme <i>A. Guardone, D. Isola, G. Quaranta</i>	1185
Prediction of Aerodynamic Propeller/Wing Interaction with a Panel Code Using Embedded Actuator Disk Model <i>G. Droandi, G. Gibertini</i>	1191
Moon Exploration	1201
Numerical Investigation on Low-Energy Transfers to the Moon through Isomorphic Mapping <i>M. Pontani, M. Giancotti, P. Teofilatto</i>	1202
Lunar Soft Landing Trajectory Optimization in a 6DoF Dynamical Model <i>R. Armellin, D. Dowlat, M. Lavagna</i>	1211
High Order Optimal Feedback Control of Lunar Landing and Rendezvous Trajectories <i>P. Di Lizia, R. Armellin, F. Bernelli-Zazzera, M. Berz</i>	1221
Renewable Energy and Energy Harvesting	1231
Green design: How to assess environmental benefits in air transport? <i>R. Ilg, H. Krieg</i>	1232
Experiences of energy harvesting using piezoelectric components <i>F. Capece, S. Gabriele, P. Gaudenzi</i>	1239
Renewable Energy Perspectives for Aviation <i>H. Kuhn, C. Falter, A. Sizmann</i>	1249
Design and testing of piezoelectric energy harvesting system from vibrations for wireless sensors <i>F. Amoroso, R. Pecora, S. Ferraro, L. Lecce, I. Girolami, P. Antuofermo</i>	1260
Space Systems Design and Analysis	1270
Structural Development of a Detachable Preburner Technical Model <i>J. Yoo, I. Moon, I. Moon, S. Yong Lee</i>	1271
Audible noise control of tas-i manned pressurized modules on international space station	1277

<i>S. Destefanis, N. Riva, R. Ullio, V. Tumminelli</i>	
Design and Analysis of an Inflatable Airlock for Space Applications <i>E. Carrera, S. Brischetto, T. Salis, M. Nebiolo, A. Rapisarda</i>	1288
Computational simulation of far-field pyroshocks including experiments and optimization <i>A. Lacher, N. Jünger, Utz von Wagner, A. Bäger</i>	1298
Spacecraft Formation Flying and Attitude Control	1308
Fusion of inter-satellite Ranging and Carrier-Phase Differential GPS for autonomous relative navigation in LEO <i>A. Renga, M. Grassi, U. Tancredi</i>	1309
Model Predictive Control Strategies for Spacecraft Formation Flying Applications <i>A. Valmorbida, G. Baù, E. C. Lorenzini, G. Sechi</i>	1322
Guidance and Control Strategies for the Collision-Avoidance Mode of a Satellite Pair Flying in Formation <i>A. Valmorbida, E. C. Lorenzini, G. Sechi</i>	1332
Steering Algorithms for Single Gimbal Control Moment Gyros in Box Configuration <i>M. Meschini, F. Curti, M. Anania</i>	1342
General Lecture	1352
What Future for the European Combat Aircraft Industry? <i>G. Bridel</i>	1353
ATM and SESAR	1358
A Comparative Study of Complexity Metric for centralised ground based Air Traffic Management <i>S. Hasan, A. Rossiter</i>	1359
Looking towards the Single European Sky: a Tailored Security Assessment for Future ATM Systems <i>F. Matarese, P. Montefusco, J. Fonseca</i>	1368
The relationship between air traffic control and cost index <i>B. Y. Acikel, A. Cavcar, U. Turhan</i>	1378
L-band Compatibility of LDACS1 <i>S. Gligorevic, N. Schneckenburger, N. Franzen, M. Schnell, S. Mülle, H. Günzel</i>	1384
Composite Materials and Technologies Applications	1392
Size and Shape optimization of Composite Stiffened Panels via MLS free-mesh morphing <i>G. Quaranta, L. Lanzi, M. Sirna</i>	1393

Design optimization of a non-crimp fabric Pi-shaped multifunctional profile for composite aero-structures <i>K. I. Tserpes, S. G. Pantelakis</i>	1403
Performance evaluation of a full composite Ultra-Light Aircraft and guidelines for their improvement <i>G. Scarselli, A. Maci, R. Zecca</i>	1409
Aircraft Preliminary Design	1417
Analysis of Pareto-Frontier for Multidisciplinary Design Optimization of Aircraft <i>F. Mastroddi, S. Gemma</i>	1418
Handling optimization problems on an example of micro uav <i>J. Mieloszyk</i>	1428
Mesh morphing applied to transonic wing optimization <i>E. Fabiano, G. Quaranta, A. Colbertaloz, L. Lanzi</i>	1439
CFD Hydrodynamic Analysis of an Ultralight Amphibious PrandtlPlane® <i>A. Frediani, M. Lucchesi, T. Lippi</i>	1450
Synthesis and Topology Study of HLFC System Architectures in Preliminary Aircraft Design <i>T. Pe, F. Thielecke</i>	1460
Preliminary Design Optimization Methods	1472
Maneuver Loads Calculation via Optimization Techniques <i>I. Ruiz Juretschke, M. Calvo Blanco, J. Román García, J. Hilario Montes</i>	1473
Multi-objective and Multidisciplinary Optimization of Wing for Small Aircraft <i>W. Stalewski, J. Żółtak</i>	1483
POD and Domain Decomposition Hybrid Method for Compressible Aerodynamics Computation <i>D. Cinquegrana, R.S. Donelli, D. Quagliarella, A. Viviani</i>	1493
Interpolation Method for Coupling CFD/CAA for Industrial Applications <i>F. Cariglino, R. Arina, A. Iob, N. Ceresola</i>	1503
A Functional Shape Parametrization Approach for Preliminary Optimization of Unconventional Aircraft <i>P. D. Ciampa, T. Zill, T. Pfeiffer, B. Nagel</i>	1513
Safety Systems and Subsystems	1525
Development of integrated functional monitoring and warnings system for Saab 39 Gripen <i>C. Birgersdotter, T. Fransson</i>	1526
Platform based Realization of Safety Relevant Systems <i>S. Hesse, R. Reichel, S. Görke</i>	1534
Simulation and Experiments for the Study of a Fault-Tolerant Hydraulic Actuator for Fly-By-Wire Helicopters <i>G. Di Rito, R. Galatolo</i>	1542

Ultrasonic Guided Waves for Structural Health Monitoring: Simulations and Experiments <i>E. Monaco, F. Ricci, S. Tancredi, D. Caporrino, L. Lecce</i>	1552
Safety and Reliability	1559
Adaptation of a Fuzzy Logic Controller to Performance Based Contracting Analysis System <i>A. Pozzetti, C. Bil, G. Clark</i>	1560
On an Engine Health Management System <i>K. Efthymiou, P. Georgakakis, N Papakostas, G. Chryssolouris</i>	1569
HECTOR: one more step toward the embedded Structural Health Monitoring system <i>C. Sbarufatti, A. Manes, M. Giglio</i>	1579
System reliability analysis: a Model-Based approach and a case study in the avionics industry <i>A. Garro, A. Tundis, N. Chirillo</i>	1587
MCDL - Multi Configurable data link <i>P. G. Crema</i>	1596
Thursday October 27th	3824
General Lecture, <i>Vision for research: Netherlands, Spain and Italy perspectives</i>	1603
Changes in the eu aeronautical mix - industry and services - after ten years into the XXI century., <i>A rewiew of the major events that have affected collaboration. The state of the situation - a view from spain</i> <i>L. B. Fernandez Sainz</i>	1604
Survival of the Fittest: 90 Years of Dutch Aeronautics RDT&E in a Globalising Environment <i>F. Abbink</i>	1611
ATM Automation	1613
UAS Air Traffic Insertion Starts Now (Real-time simulation of UAS in ATC) <i>H. H. Hesselink, D. R. Schmitt</i>	1614
Modeling and validation of aircraft mathematical models for the development of an innovative Flight Management System <i>M. Battipede, M. Cassaro, P.Gili, P. Gunetti</i>	1624
ADS/IRS/GPS Tightly Integrated Navigation Technology Based on the Fuzzy Adaptive Federated Kalman Filters <i>L.Jizhou, W. Xiuzhi, W.Hui, L. Jianye</i>	1634
ATM Airport Operations 2	1642
Description of Complex Runway Usage with Queuing Theory <i>R. Mori</i>	1643
Proof-of-Concept of an Algorithm for Aircraft Departure Sequencing <i>U. Tancredi</i>	1651

A Method for Improving Alerting Performance in Runway Incursion Alerting Systems <i>A. Sammut, D. Zammit-Mangion</i>	1661
Integration of AMAN and DMAN using Particle Swarm Optimization <i>C.A. Persiani, S. Bagassi</i>	1678
Future Cockpit Design	1685
Luminance image analysis for display visibility in cockpits <i>C. Aghemo, V. R. M. Lo Verso, A. Pellegrino, A. Fossella</i>	1686
Using Constraints Analysis for future cockpit designs <i>N. A. Stanton, K. L. Plant</i>	1696
Enhancing Safety using FLYSAFE's Next Generation-Integrated Surveillance System (NG-ISS), an Operational Simulation Assessment <i>W. F. J. A. Rouwhorst, N. De Gelder, T. H. Verhoogt</i>	1702
Virtual Reality based HUD (Head Up Display) to simulate 3D conformal symbols in the design of future cockpits <i>F. De Crescenzo, S. Bagassi, M. Fantini, F. Lucchi</i>	1716
Advancements in Fluid-Dynamics 2	1722
Fast Diagnostics for high enthalpy hypersonic flows <i>A. Esposito, E. Caso</i>	1723
Assessment of an improved Myers model for airfoil icing <i>E. Borghi, A. Guardone, G. Quaranta</i>	1733
Experimental and Numerical Investigation on the Electro Hydro Dynamic Interaction generated by a Dielectric Barrier Discharge <i>A. Cristofolini, G. Neretti, F. Roveda, C. A. Borghi</i>	1741
Space Systems Design and Analysis 2	1751
Rosetta mission: on-comet operation planning for the sampler, drill and distribution subsystem <i>P. DiLizia, P. Francesconi, F. Malnati, F. Bernelli-Zazzera, A. Ercoli-Finzi</i>	1752
Sampler, Drill and Distribution system for in-situ analysis of a cometary nucleus <i>P. Francesconi, P. DiLizia, F. Malnati, F. Bernelli-Zazzera, A. Ercoli-Finzi</i>	1762
Finite Element Analysis of a Solid Booster Flexible Joint for Thrust Vector Control <i>L. Lampani, F. Angelini, P. Gaudenzi, R. Marocco, M. Fabrizi</i>	1772
Experimental assessment of not pneumatic wheel for lunar rover technological demonstrator <i>D. Cardile, N. Viola, A. Rougier, S. Chiesa, M. A. Perino</i>	1781
ATM Operations Optimization	1788
Prediction, Detection and Avoidance of Wake Vortices Using Onboard Systems <i>S. Schönhals, M. Steen, P. Hecker</i>	1789

Climate impact assessment of varying cruise flight altitudes applying the CATS simulation approach <i>A. Koch, B. Lührs, K. Dahlmann, F. Linke, V. Grewe, M. Litz, M. Plohr, B. Nagel, V. Gollnick, U. Schumann</i>	1799
Emission-optimal flight trajectories with weather hazard avoidance and 4D wind modeling <i>R. Fernandes de Oliveira, C. Büskens</i>	1811
Multi-Objective Optimisation of a constrained 2000 km Trajectory using Genetic Algorithms <i>K. Chircop, W. Camilleri, V. Sethi, D. Zammit-Mangion</i>	1822
CFD Applications 2	1831
Preliminary evaluation and optimization of civil aircraft sonic-boom properties through Carlson's method <i>G. Scarselli, E. Castorini</i>	1832
An Application of CFD Simulation to Investigate Compressible Angle of Attack Flow Fields around the Finned Missile <i>A. Ridluan, W. Charubhun, P. Chusilp</i>	1841
LES Algorithm for Turbulent Reactive Flows simulation <i>I. Porumbel, C. Carlanescu, V. Silivestru</i>	1851
All Electric Aircraft	1861
RAPID200-FC - Flight Test of First All Electric Propulsion Aeroplane powered by Fuel Cells <i>G. Romeo, F. Borello, E. Cestino, G. Correa</i>	1862
Characterisation of the Extension/Retraction Dynamics of Electrically Powered Landing Gears <i>E. Denti, G. Di Rito, R. Galatolo, F. Schettini</i>	1872
New trends of power electronics converters architectures applied to more electric aircrafts <i>M. M. Prats, C. García, A. L. Rodriguez, L. Parrilla</i>	1879
Knowledge-based strategies for electrical aircraft wiring <i>B. Figlar, B. Mohr</i>	1887
Space Guidance, Navigation and Control	1896
Laser Altimetry at Ganymede: Mission and Performance Analysis <i>A. Memoli, M.R. Santovito, M. D'Errico</i>	1897
Preliminary Orbit Determination: Uncertainty Management via Taylor Expansions <i>R. Armellin, P. Di Lizia, M. Lavagna</i>	1907
Optimal Low-Thrust Station Keeping of Geostationary Satellites <i>F. Toppo, F. Bernelli-Zazzera</i>	1917

Safety and Security	1926
Ethical Aspects in Airport Security - A Passenger Survey <i>M. Cole, A. Kuhlmann</i>	1927
Aircraft and Rotorcraft Pilot Coupling: a survey of recent research activities within the European project ARISTOTEL <i>M. D. Pavel, J. Malecki, B. DangVu, P. Masarati, G. Quaranta, M. Gennaretti, M. Jump, H. Smaili, A. Ionita, L. Zaicek</i>	1937
Power Absorption Characterisation of Electro-Mechanical Flight Control Actuators via Detailed System Modelling <i>E. Denti, G. Di Rito, R. Galatolo, F. Schettini</i>	1967
Improving Flight Safety by Pushing the Simulation Envelope: The European Project SUPRA <i>E. Groen, L. Fucke, M. Goman, V. Biryukov, H. Smaili</i>	1974
Space Re-entry vehicles technologies	1983
Preliminary Design of Minimum Weight Configurations for a Reentry Vehicle <i>A. Viviani, L. Iuspa, G. Lanzillo, G. Pezzella</i>	1984
New Manufacturing Method of Carbon Carbon Production for Re-entry systems <i>M. Albano, P. Coluzzi, C. Vassalli, A. Grilli, M. Marchetti</i>	1994
Hot Structure Sandwich panel for advanced structure assembly (ASA) project <i>P. Coluzzi, F. Agostinelli, C. Vassalli, M. Albano, M. Marchetti</i>	2000
Testing and Certification	2005
Academic Flight Testing Capabilities Enabling Ultralight Aircraft Certification <i>L. Trainelli, A. Rolando, C. Cardani</i>	2006
A400M ES - Main Airframe Static Test <i>A. M. Gago Tripero</i>	2015
Full-Scale Static and Fatigue Tests of Aircraft Components from Composite Materials <i>M. Smoljaninov, K. Soskoveca, A. M. Sorokin, A. Chepusov</i>	2025
Evaluation of vibro-acoustic behavior of composite fuselage structures realized with embedded viscoelastic damping treatments <i>F. Amoroso, A. De Fenza, E. Monaco, R. Pecora, L. Lecce</i>	2027
Miscellanea	2035
Peridynamic and cohesive zone model approaches for crack propagation modelling <i>M. Zaccariotto, U. Galvanetto</i>	2036
Manufacturing a composite structure with applications in aeronautical field that can absorb displacements on different directions <i>M. G. Radu, V. A. Vilag, J. A. Popescu, V. Raluca, C. Stanica, V. Silivestru</i>	2046
Variable thermodynamic cycle engine with birotating turbine <i>I. Kravchenko, V. Yaishnikov, S. Risnyk, S. Dmytriiev</i>	2053

Index

Nano-sized Aluminum powders as energetic additives for hybrid propulsion: physical analyses and performance tests	2056
<i>E. Durante, A. Sossi, C. Paravan, L.T. De Luca, A. B. Vorozhtsov, A.A. Gromov, M. I. Lerner, N. G. Rodkevich, N. Savin</i>	
Robust reaction control of space manipulators	2067
<i>S. Cocuzza, S. Rossi, S. Debei</i>	
Reaction control of multi degrees of freedom space manipulators	2077
<i>S. Cocuzza, M. Chiaradia, S. Debei</i>
