

# Indice

1. Alessandro Albano, Mariangela Sciandra, Antonella Plaia and Irene Spera  
*Impact of the COVID-19 pandemic on music: a method for clustering sentiments.* 5
2. Filippo Antonazzo, Christophe Biernacki and Christine Keribin  
*A binned technique for scalable model-based clustering on huge datasets* 11
3. Gianluca Bontempi  
*Beyond uncounfoundness in predicting counterfactuals: a machine learning approach* 17
4. Carlo Cavicchia, Maurizio Vichi and Giorgia Zaccaria  
*A parsimonious parameterization of a nonnegative correlation matrix* 21
5. Luca Coraggio and Pietro Coretto  
*In-sample and cross-validated likelihood-type criteria for clustering selection* 27
6. Francesco Denti, Andrea Cappozzo and Francesca Greselin  
*Outlier and novelty detection for Functional data: a semiparametric Bayesian approach* 33
7. Roberto Di Mari, Roberto Rocci and Stefano Antonio Gattone  
*Lasso-penalized clusterwise linear regression modeling with a two-step approach* 39
8. Massimo Mucciardi, Giovanni Pirrotta and Andrea Briglia  
*EM Clustering method and first language acquisition* 45
9. Monia Ranalli and Roberto Rocci  
*Mixture of factor analyzers for mixed-type data via a composite likelihood approach* 51
10. Salvatore D. Tomarchio, Antonio Punzo and Luca Bagnato  
*Clustering three-way data with a new mixture of Gaussian scale mixtures* 57
