

## BARCA\_LLOBREGAT

Francesca Marina, Deborah Ombra, Sivia Sangriso

Within the agricultural area of Llobregat, abandoned fields cover a surface of 1.338.500mq equal to 28 times the surface of Plaça de Catalunya, the 72 present masies cover a surface of 18.000mq equal to 13,5 times Casa Milà's surface. The strategy applied for the recovery of these areas is based on the connection between points (masie) and lines (infrastructures) whose not functioning breaks the connections causing situations of abandonment. Strengthening the infrastructures and implementing the circuit of masies with new uses, also the lines-points system will return to work.
