*Author for correspondence

In our recent paper, we noticed a mistake concerning figure 2 (Di Pietro *et al.* 2021: 93). According to the caption, figure 2 should represent the sheet FI051890 (a lectotype of *Sesleria nitida* var. *tenoreana* f. *visianii*). In fact, in the place of the sheet FI051890, a figure containing two herbarium specimens deposited in PAD (PAD-HD00955 and PAD-HD00956) was erroneously published. These two PAD specimens were discussed in the paper (Di Pietro *et al.* 2021: 94) where it was highlighted that these could not be considered with certainty as original material for *Sesleria nitida* var. *tenoreana* f. *visianii* Pampanini (1917: 4).

We here, correct the mistake and publish the image of lectotype of *Sesleria nitida* var. *tenoreana* f. *visianii* (FI051890, Fig. 1).
